

**D. Metric for Graduating Students Admitted Into Top Universities (GTOP): 15 marks**

- **$GTOP = 15 \times p(n_{top})$ .**

$$n_{top} = N_{top}/N_g.$$

- $N_{top}$  = Number of graduating students who were admitted into a top university for higher studies in the previous year.
- $N_g$  = Number of graduating students in the previous year.
- ***Primary Data: Number and List of such students along with names of Universities/Institutions where admitted and year of admission, to be provided in a prescribed format.***
