

2.e **Footprint of Projects and Professional Practice (FPPP) – 20 Marks**

$$\text{FPPP} = (\text{FPR} + \text{FPC})$$

Proposed distribution:

Research Funding (**RF**) : 10 Marks,

Consultancy Funding (**CF**) : 10 Marks

Institution will be asked to provide information in a tabular form indicating funding agency, amount, duration, Principle Investigator and impact, if any.

Assessment Metric for Research Funding (RF)

FPR = 10×Percentile parameter (as a fraction) based on the average value of RF for the previous 3 years.

Here,

RF is average annual research funding earnings (amount actually received in Lakhs) at institute level for the previous three (3) years.

Assessment Metric for Consultancy:

FPC =10×Percentile parameter (as a fraction) based on the average value of CF for the previous 3 years.

Here,

CF is cumulative consultancy amount (amount actually received in Lakhs) at institute level, for the previous three (3) years.

Although the metric is same for both categories of institutions, the percentile parameters will be calculated separately for each peer group.
