

3.a. Combined Performance in University Examinations (UE) – 50 Marks

Assessment in respect of University examinations will be based on the percentage of students clearing/complying with the degree requirements in the minimum graduation time. Data will be obtained from the universities or the concerned colleges.

Here,

UE = University Examinations = 50 Marks

For Public Examinations,

$$\mathbf{UE = 50 \times (N/80)}$$

Here,

N is the percentage of Students (as a fraction of those admitted for the batch, averaged over the previous three (3) years) graduating in minimum time.

Benchmark

At least 80% students should graduate in minimum time to score maximum Marks.

Data Collection

UE data from institutions to be verified on a random sampling basis, but preferably directly from the University examination sections, if possible.
