

2.a Combined Metric for Publications (PU) – 35 Marks

It is proposed that publications in journals listed in FT-45, Scopus and Google Scholar only will be counted for assessment. An average value **P** for the previous three (3) years will be computed as detailed later in this item.

The Institution will submit faculty publication list as supporting information.

Assessment Metric for Publications:

$$\mathbf{PU} = 35 \times \mathbf{PF}/\mathbf{PF}^*$$

Here,

PF* is the maximum value of **PF** in the consideration set.

$$\mathbf{PF} = (\mathbf{P}/\mathbf{F})$$

P = Number of publications = Average of number of publications appearing in journals over the previous three (3) years.

$$\mathbf{P} = (0.3\mathbf{PFT45} + 0.6\mathbf{PS} + 0.1\mathbf{PG})$$

Here,

PFT45 : Number of publications reported in FT-45

PS : Number of publications reported in Scopus

PG : Number of publications reported in Google Scholar

F is the number of regular faculty members as used in Item 1.
