

1.c Metric for Library Facilities – 15 Marks

Library:

LI = $15 \times (\text{Percentile parameter on the basis of annual expenditure (EXLI) on library resources per student})$

EXLI = **EXLIPS** + **EXLIES**

EXLIPS = **EXLIP**/N

EXLIES = $2 \times \text{EXLIE} / \text{N}$

EXLIP : Actual Annual Expenditure on Physical Resources, Books, Journals, etc.

EXLIE : Actual Annual Expenditure on Electronic Resources, Books, Journals etc.

N : Total Number of Students.

If this expenditure is below a threshold value to be determined separately for each category of institutions, **EXLI = 0**.
