

## **2.d Percentage of Collaborative Publications and Patents (CP) – 10 Marks**

Assessment Metric for Collaborative Publication and Patents:

$$\text{CP} = 10 \times (\text{Fraction of publications jointly with outside collaborators} + \text{Fraction of patents jointly with outside collaborators})$$

In case this number turns out to be more than 10, the score will be restricted to this value.

### **Data Collection:**

Mainly from Databases like Scopus, Web of Science and Google Scholar.  
Could be aided by information from the institute.
