## Preamble, Acknowledgements and Credits

The Ministry of Education is pleased to present the sixth edition of India Rankings for the year 2021 based on the National Institutional Ranking Framework (NIRF). The sixth edition of India Rankings builds upon previous five annual exercises undertaken between 2016 and 2020 with consolidation, improvements and expansion in terms of additional categories and subject domains added to the ranking exercise and number of institutions considered for ranking.

The First Meeting of the Implementation Core Committee (ICC) for India Rankings 2021, constituted by the Ministry of Education, was convened under the Chairmanship of Secretary (HE) on 29<sup>th</sup> Sept. 2020 through video conferencing. During the Meeting, it was resolved to invite applications for participation for ranking HEIs under an additional category, namely, “Research Institutions” from 2021 onwards. During the Meeting, ICC approved the methodology for ranking of Research Institutions.

The ranking exercise for the year 2021 continues with the practice of providing a common “Overall” rank in addition to a separate rank for Universities, and Degree Colleges, and discipline-specific ranks in Engineering, Management, Pharmacy, Law, Medical, Dental and Architecture. Moreover, ranking of Research Institutions is being released for the first time under this flagship initiative of Ministry of Education, Government of India.

India Rankings continues to be a colossal and a demanding exercise that requires experts with in-depth knowledge of higher education system in India, new trends and advances in data science and data crunching. The Ministry is happy to put on record its appreciation for the *National Board of Accreditation (NBA)* for its continued zeal and for executing this task with utmost dedication, under the guidance of the Implementation Core Committee (ICC). The NIRF Team at NBA together with the team of its partner institution, i.e. INFLIBNET Centre at Gandhinagar have played a vital role in the execution of this task.

## Preface

### India Rankings 2021: Towards Consolidation, Improvement and Expansion

The Ministry of Education (MoE) is pleased to announce India Rankings 2021. We are indeed grateful to Shri Dharmendra Pradhan, Honourable Minister for Education for e-release of the India Rankings 2021 on 9<sup>th</sup> September, 2021.

This is the sixth consecutive edition of India Rankings of institutions of higher education in India in four categories, namely Overall, Colleges, Universities & Research Institutions and seven subject domains, namely Engineering, Management, Pharmacy, Law, Medical, Architecture and Dental. The National Institutional Ranking Framework (NIRF), launched on 29<sup>th</sup> September 2015 by the Ministry of Education, was used for this edition as well as for the previous five consecutive editions of India Rankings released every year since 2016. Unlike other rankings in the popular media, India Rankings deploys objective parameters and metrics with factual data gathered from applicant institutions themselves as well as from third party sources such as Web of Science, Scopus and Derwent Innovations. Several improvements in data collection formats, metrics and comparison methodology were adopted and put in practice for India Rankings over past six years.

India Rankings 2021 continued with the consolidation, improvement, and expansion as we built upon the NIRF parameters defined in 2015 through experience gained over the years and feedback from stakeholders. In the process, effective and efficient benchmarks have successfully been established to assess performance of the Indian academic institutions in the higher education space. Changes in metrics, parameters and normalization algorithms were introduced over the years, although the basic framework was kept intact. As a result, the ranking of institutions has largely remained consistent, especially amongst first 25 top-ranked institutions, over the years, although individual ranks might have changed by a few slots in some cases due to performance variations across institutions on some of the parameters. As such, India Rankings is successful in identifying top institutions of higher education in four categories and seven subject domains mentioned above.

The practice of pre-registration of institutions that had participated in India Rankings in previous year, was continued this year also. Moreover, new institutions were invited to participate in the ranking exercise through an open advertisement. A total number of 4030 unique institutions responded and offered themselves for ranking under “Overall”, category-specific or domain-specific rankings. In all, 6,272 applications for ranking were made by these 4030 unique applicant institutions under various categories and / or subject domains.

The India Rankings has successfully instilled the culture of collection, compilation and curation of data required for ranking of institutions and is sourced from applicant institutions themselves. Applicant institutions are now carefully maintaining data pertaining to their faculty, students, placement, infrastructure, expenditure on library, laboratories, equipment, operations, etc. This culture is important for institutions themselves since analysis of this data provides the big picture of trends and patterns that can be used for evaluating and streamlining processes, creating efficiencies, and improving overall student experience. While at institutional level, the data and its analytics can help in assessing

institutions themselves against internal benchmarks, at the national level, the data can serve as a base for analysis of status of higher education institutions in the country.

It is important that the credibility that the India Rankings have earned is maintained with careful attention to details. As a matter of practice, 100 institutions are ranked in Overall, University, and College categories whereas ranking is kept restricted between 25 and 75 institutions in all other subject domains/categories, i.e. Architecture, Pharmacy, Management, Law, Medical, Dental as well as Research Institutions which was ranked for the first time this year. However, number of Engineering institutions that are being ranked has been increased from 100 to 200 from 2019 onwards. It may further be noted that all data for ranked institutions is painstakingly verified, inconsistencies, contradictions and outliers are screened and identified, which requires a lot of diligence, patience and tactful handling of institutions who might feel offended with direct and blunt questions on validity of data submitted by them. It requires a lot of patience in educating individual institutions on the quality requirements on the data submitted by them. NIRF Team has made extensive use of triangulation methods for detecting aberrations, contradictions and inconsistencies and effecting corrections in consultation with the concerned institutions. Persistent emphasis on accuracy of data on the part of NIRF has yielded positive results with change in tendency of institutions to present inflated numbers. With continuing improvement in reliability of data from institutions, it would be possible for NIRF team to concentrate on refining existing ranking parameters and metrics and pursuit for additional parameters that can be deployed for ranking of institutions. Moreover, it would also be possible to bring-in larger number of institutions into the ambit of rankings with a goal of ranking every deserving institution.

Besides, sourcing data on various parameters from applicant institutions, third party sources of data have also been used, wherever possible. Scopus (Elsevier Science) and Web of Science (Clarivate Analytics) were used for retrieving data on publications, citations, and highly cited papers. Derwent Innovation was used for retrieving data on patents. Data retrieved from these sources was shared with the institutions for transparency with a provision to give their inputs in case they are not agreeable to the data retrieved from third party sources.

The ranking framework evaluates institutions on five broad generic groups of parameters, i.e. *Teaching, Learning and Resources (TLR)*, *Research and Professional Practice (RP)*, *Graduation Outcome (GO)*, *Outreach and Inclusivity (OI)* and *Perception (PR)*. Ranks are assigned based on total sum of marks assigned for each of these five broad groups of parameters. Performance of ranked institutions can be seen on any of the five broad groups of parameters. A 5-dimensional view of institutions across the 5 broad generic groups of parameters provides relative strengths of the institution. Moreover, positive, and strong correlation is observed between rank of institutions based on all five broad generic groups of parameters and its rank on the basis of "*Research and Professional Practice (RP)*".

It can also be observed that public-funded institutions including CFTIs, and a few centrally funded universities hog most of the top-ranks in almost all categories of rankings. Moreover, a significant number of state and privately funded universities and institutions appear in top 100 ranks in various categories of ranking.

## Terminology, Abbreviations and Acronyms

Abbreviation Used	Full Form
A&HCI	Arts & Humanities Citation Index
AICTE	All India Council for Technical Education
AISHE	All India Survey of Higher Education
BKCI-S	Book Citation Index- Science
BKCI-SSH	Book Citation Index- Social Sciences & Humanities
CFIs	Centrally Funded Institutes
CFTIs	Centrally Funded Technical Institutes
CPCI-S	Conference Proceedings Citation Index- Science
CPCI-SSH	Conference Proceedings Citation Index- Social Sciences & Humanities
CSIR	Council of Scientific & Industrial Research
DAE	Department of Atomic Energy
DCS	Data Capturing System
ESCS	Economically and Socially Challenged Students
FPPP	Footprint of Projects, Professional Practice and Executive Development Programs
FQE	Faculty's Qualification and Experience
FRU	Financial Resources and their Utilisation
FSR	Faculty-Student Ratio
GO	Graduation Outcome
GPHD	Metric for Number of Ph.D. Students Graduated
GPHE	Combined Metric for Placement, Higher Education and Entrepreneurship
HCP	Highly Cited Papers
HEIs	Higher Education Institutions
ICC	Implementation Core Committee

Abbreviation Used	Full Form
INFLIBNET	Information and Library Network
IPR	Intellectual Property Right
ISRO	Indian Space Research Organisation
JCR-Q1	Journal Citation Report - First Quartile
MS	Median Salary
NBA	National Board of Accreditation
NIRF	National Institutional Ranking Framework
OI	Outreach and Inclusivity
PCS	Facilities for Physically Challenged Students
PR	Perception
PRACD	Peer Perception: Academic Peers
PREMP	Peer Perception: Employers and Research Investors
PU	Combined Metric for Publications
QP	Quality of Publications
RD	Region Diversity: Percent of Students from other States/ Countries
RP	Research and Professional Practice
SCI-Expanded	Science Citation Index Expanded
SS	Student Strength
SSCI	Social Sciences Citation Index
TLR	Teaching, Learning & Resources
UE	Metric for University Examinations
UGC	University Grants Commission
WD	Women Diversity: % of Women

## 1. Background

The process of framing National Institutional Ranking Framework (NIRF) began on October 9, 2014, with constitution of a 16-member Core Committee under the chairmanship of Secretary (HE), Ministry of Education. The terms of reference of the Committee were to suggest a reliable, transparent, and authentic National Framework for measuring performance and ranking of institutions of higher education and to recommend institutional mechanisms, processes and timelines for implementation of the National Institutional Ranking Framework. The framework was given a final shape after intense discussions and deliberations during a series of meetings of the Committee and exchanges with peers and stakeholders mainly through online modes.

The NIRF envisaged separate rankings for different categories and subject domains. As such, category-specific and domain-specific frameworks were drafted for every category and subject domain based on the broad recommendations of the National Institutional Ranking Framework. Frameworks for Universities, Colleges, Engineering, Pharmacy and Architecture were released in 2015. Frameworks for other categories and domains were drafted in the years of their induction for ranking under India Rankings. Likewise, draft framework for ranking of HEIs under “Research Institutions” category was approved in the 1<sup>st</sup> Meeting of the Implementation Core Committee (ICC) of NIRF Scheme held on 29<sup>th</sup> Sept. 2020 which was appointed by the Ministry of Education to oversee implementation of rankings under overall National Institutional Ranking Framework (NIRF).

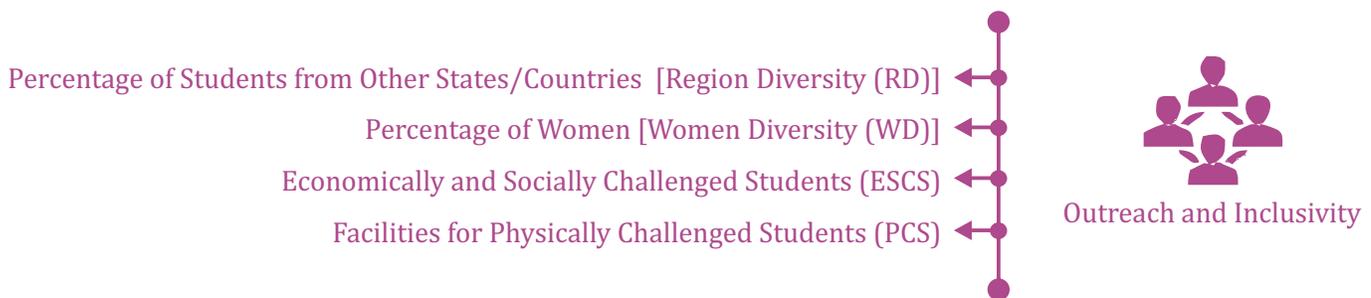

A common Overall ranking was introduced for institutions that have a minimum of 1,000 students from the year 2017 onwards in addition to other category-specific and domain-specific rankings to provide a common view of comparable institutions across categories and disciplines. This practice is being continued for the past five years as well as in the current year. In the year 2016, rankings were announced for Universities and for the subject domains of Engineering, Management and Pharmacy. In 2017, in addition to these four rankings, the Overall ranking, and ranking of General Degree Colleges were introduced for the first time. In the years 2018, while continuing with above mentioned six rankings, three domain-specific rankings in the fields of Law, Medicine and Architecture were introduced. In the year 2019 ranking was carried out for three Category-specific Rankings (Overall, Universities and Colleges) and six Domain-Specific Rankings inducted from 2017 to 2018. In addition to ranking of HEIs in nine categories and domains, ranking of Dental institutions was introduced in 2020. In the year, 2021, in addition to ranking under three categories and seven subject domains, mentioned above, HEIs in India are also being ranked under Category “Research Institutions” taking the total tally to 11 rankings including ranking in four categories, namely Overall, Universities, Colleges and Research Institutions and seven subject domains, namely Engineering, Management, Pharmacy, Medicine, Architecture, Law, and Dental.

The final ranking framework has identified between 16-18 parameters organised in five major groups. Several of these parameters are common to those employed globally and serve as pointers to ambience for teaching, learning and research. However, there are a few India-centric parameters, reflecting aspirations of the rising numbers of our young people enrolled into higher education institutions. Country-specific parameters relevant to the Indian situation include regional diversity, outreach, gender equity and inclusion of disadvantaged sections of the society.

The spirit of the Ranking Framework and parameters originally identified by the Core Committee and used for India Rankings for the past five years is being retained for the year 2021. Minor changes were made based on the experience gained in the process of ranking of institutions in previous five years.

## 2. NIRF Parameters for Ranking of Institutions of Higher Education

The NIRF provides for ranking of institutions in five broad generic groups of parameters, namely: *i) Teaching, Learning and Resources; ii) Research and Professional Practice; iii) Graduation Outcome; iv) Outreach and Inclusivity; and v) Perception.* Fig. 1 provides an outline of the various sub-parameters for each of the five generic groups.

**Fig. 1: NIRF Parameters for Ranking of Institutions**

By and large, India Rankings continues to give a lot of emphasis to collection, verification and use of reliable data, unlike global rankings that gives dis-proportionate weightage to perception and internationalization (in terms of international students and international faculty), NIRF relies on ranking based on data, which is more objective, especially in a large higher education system like India, where perception data alone can be misleading and amenable to manipulation. Although, the task of collection, verification, and authentication of data from a large number of institutions, is challenging.

### **3. Metrics to Compute Ranking Scores**

The framework for ranking of institutions is available on the NIRF Web site (<https://www.nirfindia.org/>) in the Ranking Documents for various categories and domains. These documents identify the relevant data required to suitably measure the performance score under each sub-parameter mentioned above and enunciate a suitable metric that is used to compute a score for the sub-parameter. The sub-parameter scores are then added to obtain scores for each individual parameter. The overall score is computed based on the weights allotted to each of the five broad group of parameters.

### **4. Major Changes Introduced in India Rankings 2021**

Implementation Core Committee on India Rankings, in its meeting held on 29<sup>th</sup> Sept. 2020 approved use of framework, methodology and metrics used for ranking of HEIs for India Rankings 2020 as well as for its previous editions. However, the following changes were approved in methodology used for ranking of Medical institutions:

- I) Abbreviation used for “Number of PG Students Graduated” shall be GPG instead of GPHD; and
- ii) The marks distribution in Graduation Outcome parameter would also be revised to increase marks of Metric for Number of Super Speciality Student Graduated from 10 to 20 thereby reducing marks for Placement and Higher Studies and University Examinations from 30 to 25 each. Revised copy of the framework for Medical Institutions is available on the NIRF Web site.

Moreover, parameters and methodology for ranking institutions under “Research Institutions” was developed afresh under the overall National Institutional Ranking Framework (NIRF). Two additional parameters that are used for ranking of Research Institutions are:

- a) Research Papers published in journals covered in the First Quartile of Journal Citation Report (JCRQ1); and
- b) H Index.

Copy of the framework for Research Institutions is available on the NIRF Web site.

### **5. Participation: Pre-registration and New Registration**

In order to encourage larger participation in India Rankings, all institutions that had applied in the previous year, were pre-registered for India Rankings 2021 and were invited to participate in the ranking exercise. In addition, other institutions desirous of participating in the India Rankings 2021 were invited to register on the NIRF Web portal through a public advertisement. All institutions were requested to submit their applications online for ranking under Overall category as well as for ranking in one or more disciplines along with relevant data in a prescribed format by 24<sup>th</sup> Dec. 2020. Table 1 provides number of institutions that were pre-registered as well as those who registered themselves voluntarily. Table 2 and 3 provide number of participating institutions in different categories and domains and their geographical distribution respectively.

Description	Registered	Submitted
Pre-registration	3620	3366
Registration	958	664
Total	4578	4030

**Table 1: Participation Numbers for Pre-registration and New Registration**

Category / Discipline	Total Number of Institutions	CFTIs and CFUs
Overall	1657	91
Engineering	1143	60
Management	659	34
Pharmacy	351	6
Architecture	78	14
College	1802	1
Medical	111	2
Law	120	7
Research	234	54
Dental	117	2
<b>Total</b>	<b>6272</b>	<b>271</b>

**Table 2: Participation Numbers for Overall, Category and Domain-specific Ranking**

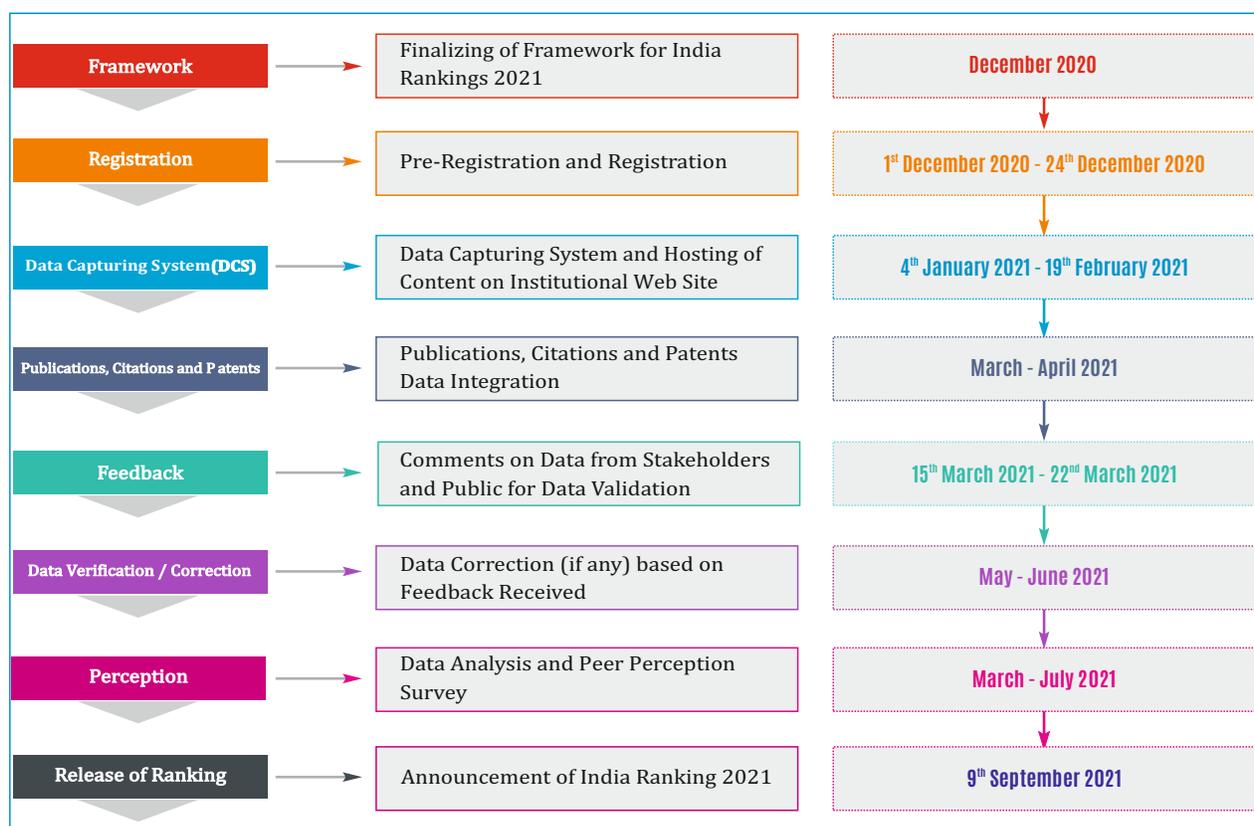

Discipline / Region	Overall	Engg.	Mgmt.	Pharma.	Arch.	College	Med.	Law	Res.	Dental	Total
North	220	172	153	61	20	156	24	44	62	32	944
South	770	571	261	118	25	921	56	23	97	56	2898

## 6. Methodology

### 6.1 India Rankings 2021: Activity Calendar

Activity Calendar for India Rankings 2021 was revisited during the 1<sup>st</sup> Meeting of the Implementation Core Committee (ICC) held on 29<sup>th</sup> Sept. 2020 to accommodate delay in academic calendars of HEIs because of COVID 19 pandemic. The process of inviting HEIs for submission of data for ranking was delayed for a month. The Data Capturing System (DCS) of India Rankings that is generally opened in mid-September was opened in December 2020 since several HEIs were not able to take examinations and declare results of their students. Revised Activity Calendar for India Rankings 2021 is given in Fig. 2.

**Fig. 2. India Rankings 2021: Activity Calendar**

## 6.2. Source of Data: Institutions and Third Party Sources

In the absence of a reliable and comprehensive database that could supply all relevant data required for computing the scores for ranking of HEIs, registered institutions were invited to submit the required data through an Online Data Capturing System (DCS). Publications, citations and HCP pertaining to research output of applicant institutions were retrieved from Scopus (Elsevier Science) and Web of Science (Clarivate Analytics). Data on patent published and granted was taken from Derwent Innovation.

## 6.3. Data Collection and Data Capturing

Data Capturing System (DCS), Feedback System and the Perception Capturing System were developed for online capturing of data from applicant institutions, feedback from public and institutional perception (from Peers and Employers). As mentioned earlier, the data on publications, citations and highly cited papers were retrieved directly from third-party sources. A brief description on data collection and data capturing is given below.

### 6.3.1. Online Data Capturing System (DCS)

Data capturing system sought the detailed data in a format that facilitated computing the ranking metrics for each parameter as well as for checking consistency of data. Detailed notes were provided to explain every data element to help institutions to comprehend each data element and provide correct data. Attempts were made to keep the data entry to a minimum. Data of the previous year in respect of the faculty, was pre-populated in the DCS, with provision for changes with suitable remarks/reasons for the changes.

Help desks were deployed to resolve general and technical issues faced by the applicant institutions during the entire execution process of India Rankings 2021.

### **6.3.2. Publications, Citations and Highly Cited Papers (HCP): Web of Science (WoS) and Scopus**

Two sets of citation databases were used as sources for retrieving data on the number of publications, citations, and highly cited papers for the applicant institutions. These citation databases comprise of: i) Science Citation Index Expanded (SCI-Expanded), Social Sciences Citation Index (SSCI), Arts & Humanities Citation Index (A&HCI), Conference Proceedings Citation Index - Science (CPCI-S), Conference Proceedings Citation Index - Social Sciences & Humanities (CPCI-SSH), Book Citation Index- Science (BKCI-S), Book Citation Index- Social Sciences & Humanities (BKCI-SSH), Emerging Sources Citation Index (ESCI) and Current Chemical Reactions (CCR-EXPANDED) hosted on the Web of Science platform; and ii) Scopus. These sources of publications and citations cover all disciplines comprehensively.

These databases were searched to determine the quantitative productivity of all eligible applicant institutions that registered themselves for ranking. The search included number of research articles published and citations received by them in a span of three calendar years, i.e. 2017, 2018 and 2019. A common time window was used to obtain this data covering a short span of two weeks, i.e. between 25th March to 5th April, 2021, for all institutions to ensure fairness.

#### **6.3.2.1 Search Strategy for Retrieving Research Publications, Citations and Highly Cited Papers from WoS and Scopus**

All permutations, combinations, and changes in the names of institutions were used while searching for articles published by faculty and researchers in the databases mentioned above. Since searches were conducted using names of institutions, articles that did not have institutional affiliations of their faculty and researchers were not retrieved.

Several universities host other research institutions within their physical premises. Care was taken to ensure that credit for publications and citations are given to the concerned institutions. Manual checking of retrieved data was done in cases i) where two institutions with same (or similar) names, ii) institutes that share the same physical premise; and iii) multiple institutes having the same name in the same city.

Some private universities have several constituent colleges and institutions (either in the same city or in different cities) that are their integral part. Information was sought from the applicant institutes and universities about such constituent entities. Publications and citations received by such constituent entities were credited to the applicant institution after due verification.

Many variations in the names of universities and institutions, their physical locations and their spellings were discovered during the searches in the databases. The NIRF has taken every care to be accurate on this count. Moreover, the data on highly cited papers were retrieved from Web of Science and data on Field-weighted Citation was obtained from Scopus (Elsevier Science). Data on patents granted and published for each institution in the last three years was retrieved from Derwent Innovation.

#### **6.3.2.2 Restricting Retrieval of Articles to a Given Discipline**

Searches for publications and citations were done in the two databases, namely Web of Science (Clarivate Analytics) and Scopus (Elsevier), for applicant institutions without any subject-wise and discipline-wise restrictions for the Overall ranking of institutions. However, subject/discipline-specific searches were made for all other discipline-wise

rankings in the interest of uniformity and fairness. Care was taken to design the restriction to get the widest possible coverage of sub-disciplines within each broad discipline.

### **6.3.2.3 Online Perception Capturing System**

An online platform was developed to capture the perception inputs from peers and employers. A large number of peers (subject experts) were invited to submit their perception feedback on applicant institutions in a prescribed format.

## **6.4 Online Feedback System**

Stakeholders (that included public or other individuals or entities having an interest in one or more institutions) were invited to give their feedback through “Online Feedback System” from 15th to 22nd March 2021 on the data submitted by the institutions, through a public advertisement in the newspapers and other media. The comments / feedback so received were auto-transmitted through an email without disclosing the identity of the stakeholder to the concerned institution(s) for taking necessary action at their end.

## **6.5 Data Verification**

### **6.5.1. Scouting for Outliers: Committees of Domain Experts**

Committees consisting of academic experts examined the data submitted by institutions under each of the five broad generic groups of parameters, for every category / discipline. These Committees examined the data on various parameters minutely and identified outliers, aberrations, and anomalies for further scrutiny. Institutions whose data seemed exaggerated or had anomalies were contacted telephonically and via e-mail to confirm or correct the data. Where it was felt necessary, they were asked to support their data with documentary evidence. Several e-mails were sent, and telephonic calls were made to various institutions for verification of data on different parameters and sub-parameters.

### **6.5.2. Communication with Nodal Officers**

Each institution was asked to nominate one of their senior functionaries as a nodal officer for dealing with NIRF matters. These nodal officers were contacted to clear doubts or to attend to the feedback and anomalies pointed out by the expert committees. For increased transparency, an advisory was sent to each institution to upload this data on their own website for dissemination to the public. For all the top-ranked institutions, the latest version of the corrected data based on further inputs from the institutions was made visible on the NIRF portal.

While significant efforts were made to authenticate the data, the final responsibility for the accuracy of the submitted data lies with the concerned institutions.

### **6.5.3. Verification of Data on Publications, Citations and Highly Cited Papers**

The data on publications, citations and highly cited papers were shared with each applicant institution from 21st to 28th June 2021. Institutions were informed that the data was captured between 25th March to 5th April, 2021 for all institutions.

## 6.6 Inclusions and Exclusions

The NIRF website and NIRF guidelines provides basic qualifiers for an institution to participate in India Rankings 2021 for Overall ranking as well as for domain-specific and category-specific ranking. For example, an institution should have at least 1,000 students enrolled for various courses at undergraduate and post graduate level to participate in Overall ranking. Institutions are also required to have graduated a minimum of three batches and qualify for minimum Faculty Student Ratio (FSR) as mentioned in the NIRF Methodology document for respective category and discipline.

A new category, namely “Research Institutions” is being introduced for the first time to rank institutions that have higher research output in terms of publications, citations, patents, research grants and spending on research. As such, all applicant HEIs having published more than 500 research papers in peer reviews journals or at least 1,000 students pursuing Ph.D, were considered for ranking in Research Institutions category.

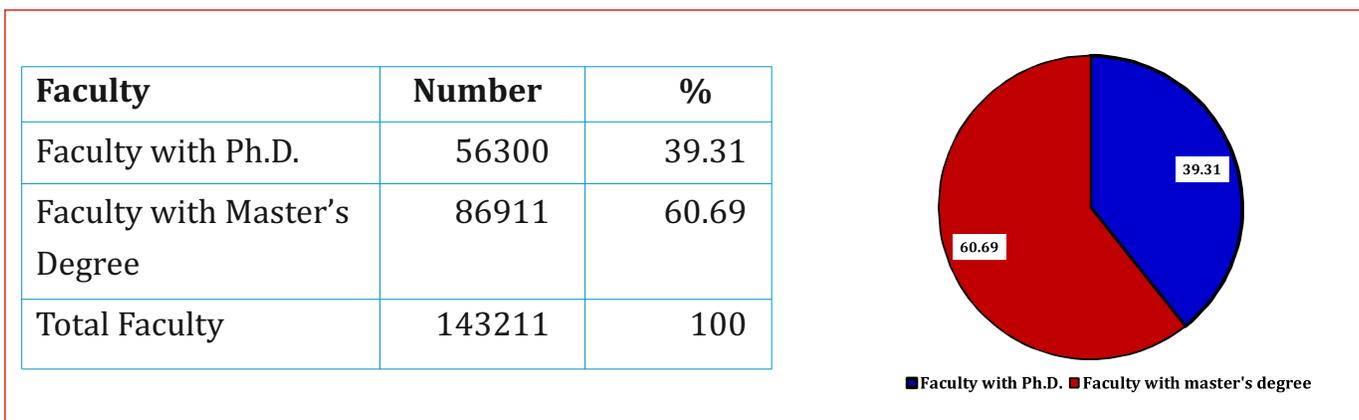

## 7. Visualizing Data Beyond Rankings: Additional Insights

Data for India Rankings 2021 under category-specific and domain-specific ranking was taken from applicant institutions under five broad generic parameters and 16 - 18 sub-parameters, depending upon a given category or a subject domain. Moreover, data on publications, citations and patents was taken from Scopus (Elsevier Science), Web of Science (Clarivate Analytics) and Derwent Innovation. Besides using this data for ranking of institutions, the combined collection of data for all eligible institutions offers a unique opportunity for analysis and to get interesting and useful insights. Some of the important observations based on a simple data analysis are given below. India Rankings considers data for three years. As such data quoted here refer to three-year period, i.e. 2017 to 2019.

### 7.1 Teaching, Learning and Resources

Engineering education has witnessed a phenomenal growth in India in past two decades with thousands of engineering institution, in private sector and well as in Government sector, coming-up in almost all parts of the country. As such, discipline of engineering is selected for analysis of faculty data to get a bigger picture of higher education institutions in India. The discipline is also undergoing a major challenge in terms of quality and employability of its graduates.

Fig. 3, 4, 5 and 6 below show interesting statistics regarding faculty, their qualifications and teaching experience for all applicant institutions in engineering discipline. Only 39.31% engineering faculty have doctoral qualifications as depicted in Table 4 and Fig. 3.

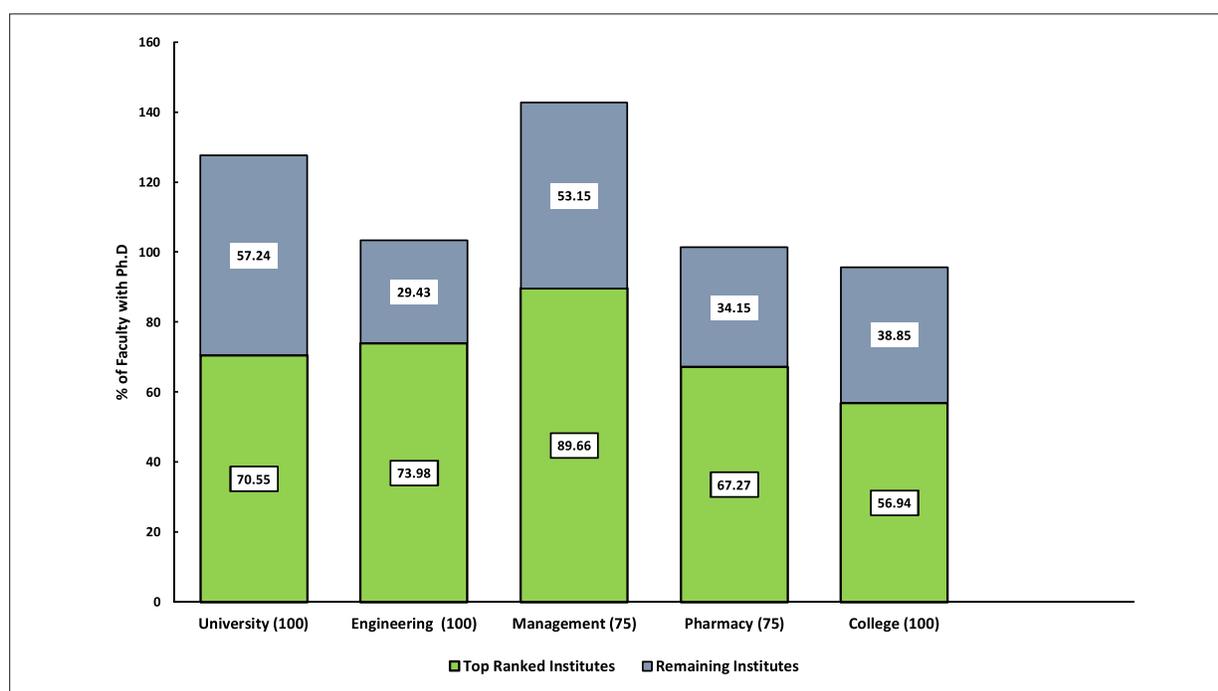

**Table 4 and Fig. 3: Faculty with Ph.D vs Faculty with Master's Degree**

It was observed that faculty with doctoral qualification is concentrated in top 100/75 institutions, remaining institutions have fewer faculty with doctoral degree. This is a serious handicap since mentorship received during the doctoral training can play a vital role in preparing the faculty for a teaching career in higher education. Table 5 and Fig. 4 depict distribution of faculty with Ph.D. in top 100/75 institutions in various categories and subject domains as compared to faculty with Ph.D. in remaining eligible institutions. It can be observed that faculty with Ph.D. in top 100/75 institutions vary from minimum of 67.27% in case of pharmacy to the maximum of 89.66% in case of management institutions. Whereas faculty with Ph.D. in remaining institutions vary from minimum of 29.43% in case of engineering institutions to the maximum of 57.24% in case of universities. Moreover, average number of faculty in top 100/75 institutions vary from minimum of 51.82 and 69.08 in case of Pharmacy and Management to the maximum of 621.73 and 580.39 in case of University and Overall categories respectively as oppose to the minimum of 17.15 and 28.25 in case of Management and Pharmacy to the maximum of 169.52 and 239.33 in case of Overall and University respectively.

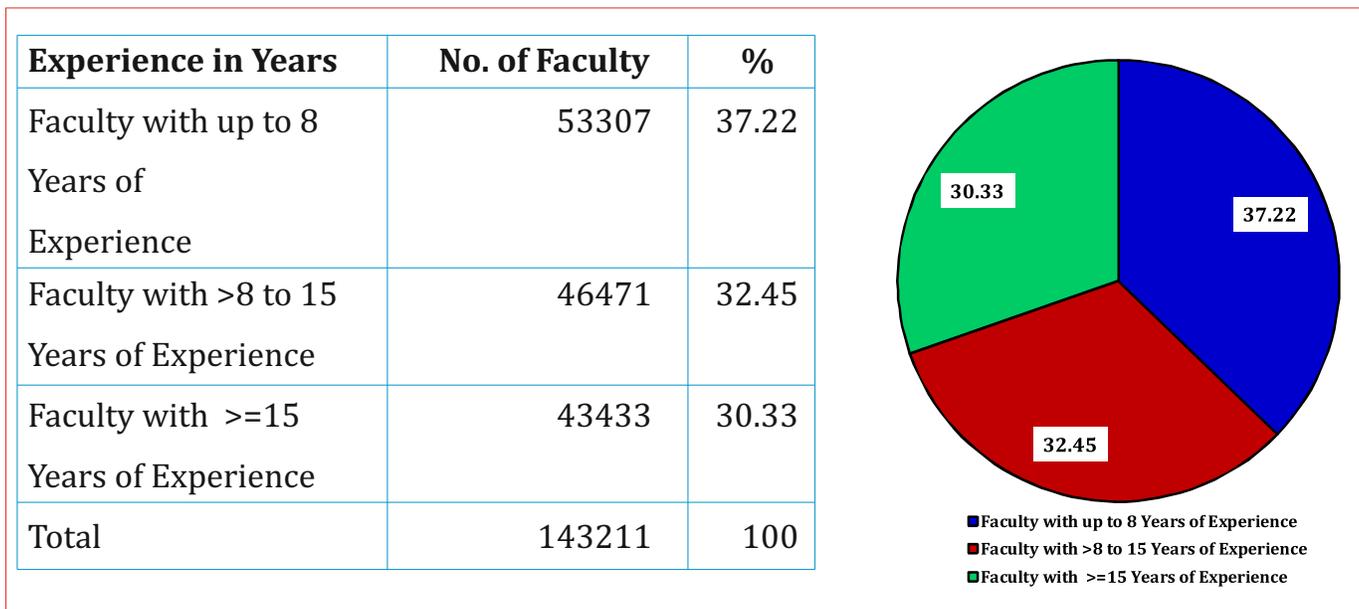

Category	Top 100/75 Institutes				Remaining Institutes				
	Total Faculty	Faculty with Ph.D.	%	Average No. of Faculty	Total Faculty	Faculty with Ph.D.	No. of Remaining Inst.	%	Average No. of Faculty
Overall (100)	58039	43413	74.80	580.39	147485	65695	870	44.54	169.52
University (100)	62173	43862	70.55	621.73	50020	28630	209	57.24	239.33
Engineering (100)	31779	23511	73.98	317.79	111432	32789	976	29.43	114.17
Management (75)	3454	3097	89.66	69.08	9053	4367	528	48.24	17.15
Pharmacy (75)	2591	1743	67.27	51.82	7289	2214	258	30.37	28.25
College (100)	17347	9877	56.94	173.47	71319	27704	1009	38.85	70.68

**Table 5: Distribution of Faculty with Ph.D in Top 100/75 institutions as Compared to Faculty with Ph.D in Remaining Eligible institutions in Various Categories and Subject Domains**

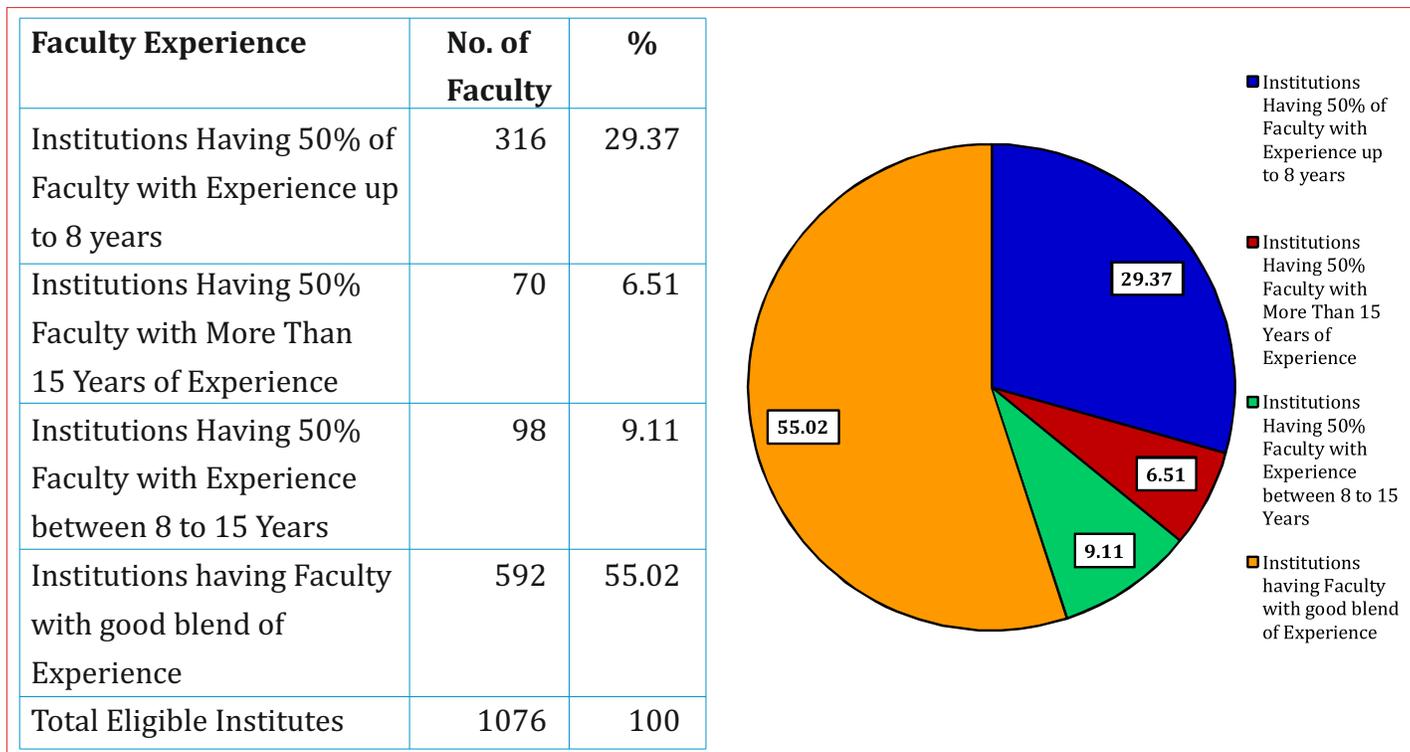

**Fig. 4: Distribution of Faculty with Ph.D in Top 100 / 75 Institutions as Compared to Faculty with Ph.D in Remaining Eligible Institutions in Various Categories and Subject Domains**

Table 6, Table 7 and Figs. 5 & 6 depict teaching experience of faculty in eligible institutions in engineering discipline. These Figures clearly support the common perception that many institutions are starved of senior and experienced faculty. In other words, the burden of the teaching is largely in the hands of relatively inexperienced faculty, which puts another serious question mark on its impact on the quality of education.

**Table 6 and Fig. 5: Experience Profiles of Faculty in Eligible Institutions**

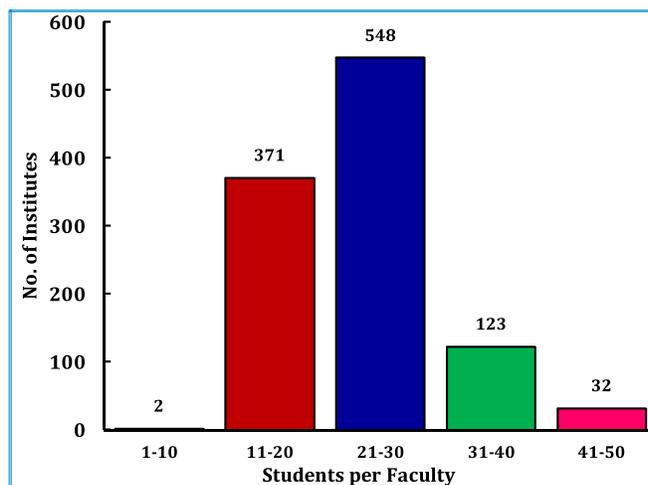

**Table 7 and Fig. 6: Young vs Experienced Faculty**

As shown in Table 7 and Fig. 6, 346 institutions (34.36%) qualify the AICTE-prescribed FSR of 20 students per faculty whereas remaining 661 institutions are trying to achieve the acceptable norm.

As shown in Table 8 and Fig. 7, 373 institutions (34.67%) qualify the AICTE-prescribed FSR of 20 students per faculty whereas remaining 703 institutions are trying to achieve the acceptable norm.

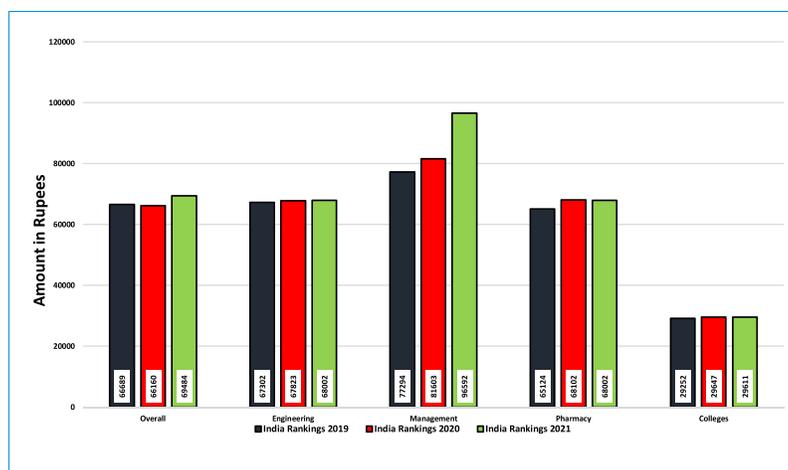

Faculty Range	No. of Institutions	%
1 - 10	2	0.19
11 - 20	371	34.48
21 - 30	548	50.93
31 - 40	123	11.43
41 - 50	32	2.97
Total	1076	100

**Table 8 and Fig. 7: Faculty Student Ratio in Applicant Engineering Institutions**

Table 9 and Fig. 8 provides data on Median Financial Resource Utilization (FRU) per student in various categories and subject domains. The FRU is maximum (Rs. 96,592.00) in case of Management that has registered an increase of 24.97% over the FRU of Rs. 81,603.00 in 2020.

Category / Domain	India Rankings			% Increase
	2019	2020	2021	
	Amount in Rs.			
Overall	66689	66160	69484	4.19
Engineering	67302	67823	68002	1.04
Management	77294	81603	96592	24.97
Pharmacy	65124	68102	68002	4.42
Colleges	29252	29647	29611	1.23
<b>Total</b>	<b>305661</b>	<b>313335</b>	<b>331691</b>	<b>8.52</b>

**Table 9 and Fig.8: Median Financial Resource Utilization (FRU) per Student in Various Categories and Subject Domains**

## 7.2 Research and Professional Practice

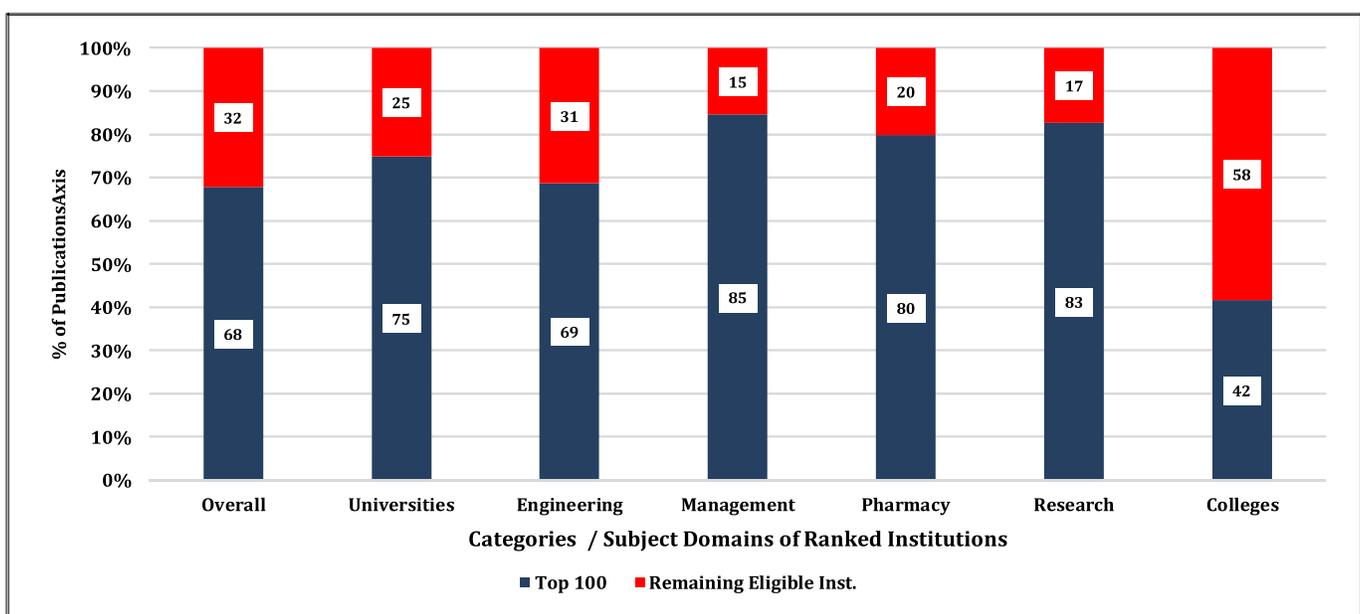

As mentioned earlier, NIRF has used third party sources to extract information on scholarly output (including research publications, citations, and patents) by applicant institutions. For the brief analysis presented here, we have restricted use of data from only one source, i.e., Web of Science, in the interest of simplicity. Data quoted here refer to the three-year period, i.e. 2017 to 2019 considered for ranking for India Ranking 2021.

### 7.2.1. Comparing Research Publications of Top 100 Institutions vs Rest of the Eligible Institutions in Various Domains / Categories

Table 10 and Fig. 9 summarises the total number of publications for various domains and categories of India Rankings 2021. The Table provides a comparison of research publications of top 100 institutes with the rest of the eligible institutions in the same domain / category. It is interesting to note from the first row that 67.96% of the research publications come from the top 100 institutions in “Overall” category with the remaining 870 participating and eligible institutions contributing only 32.04% of research publications. A similar conclusion can be drawn for all other categories except for Colleges. The data seems to follow the famous Pareto’s principle, in the sense that most of the research is being conducted within the top 100 institutions in every category. On the positive side, it appears that a large number of general degree colleges are active in research and publications activities. However, there is a significant overlap amongst various categories/disciplines since most of the institutions are applicant for ranking in multiple categories / domains.

No. of Eligible Inst.	Discipline / Categories	Total Number of Publications	Publications of Top 100 Institutions	Publications of Remaining Institutions	Top 100 Inst.	Remain-ing Inst.	Average No. of Publications / Institute
					(% of Pubs)		
970	Overall	324169	220319	103850	67.96	32.04	334.19
309	Universities	200074	149831	50243	74.89	25.11	647.49
1076	Engineering	174463	119997	54466	68.78	31.22	162.14
603	Management	3480	2946	534	84.66	15.34	5.77
333	Pharmacy	5714	4564	1150	79.87	20.13	17.16
192	Research	297589	246068	51521	82.69	17.31	1549.94
1109	Colleges	15713	6566	9147	41.79	58.21	14.17

**Table 10: Research Publications of Top 100 Institutions as Compared to the Rest of the Eligible Institutions in Various Domains / Categories**

**Fig. 9: Research Publications of Top 100 Institutions as Compared to the Rest of the Eligible Institutions in Various Domains / Categories (in %)**

Table 10 and Fig. 9 also conveys that the share of research publications in Management, Pharmacy and general degree Colleges is at a much smaller scale in comparison to publications in Overall, Universities and Engineering discipline. In fact, in the Management discipline, the average publications count is 5.77 (Column 8; Row 4) per institute in three years, i.e. a little less than two publications per year. However, since the top 100 institutions in Management category publish 84.66% of publications, the average count for the top 100 is, in fact, fairly good. As a further caution, it may be noted that this data pertains to publications belonging to the Management discipline as categorized by the Web of Science. Clearly, many of the best management schools also publish in allied areas such as Economics, Social Sciences, Information Technology and Psychology – which may not belong to mainstream Management discipline, and therefore, excluded from consideration here.

### 7.2.2. Bradford's Empirical Law as Applied to Concentration of Publications in Most Productive Institutions

It is observed that the Bradford's empirical law of concentration of journal articles in scientific periodicals is also applicable to the research productivity of ranked HEIs. The Bradford's Law states that articles in a given subject concentrate heavily in a relatively small number of highly productive journals. As per the Bradford's Law "if scientific journals are arranged in order of decreasing productivity of articles in a given subject, they may be divided into a nucleus of periodicals more particularly devoted to the subject, and several groups of zones containing the same number of articles as the nucleus, when the number of periodicals in the nucleus and succeeding zones will be as 1:n:n2..." (Bradford, 1944)

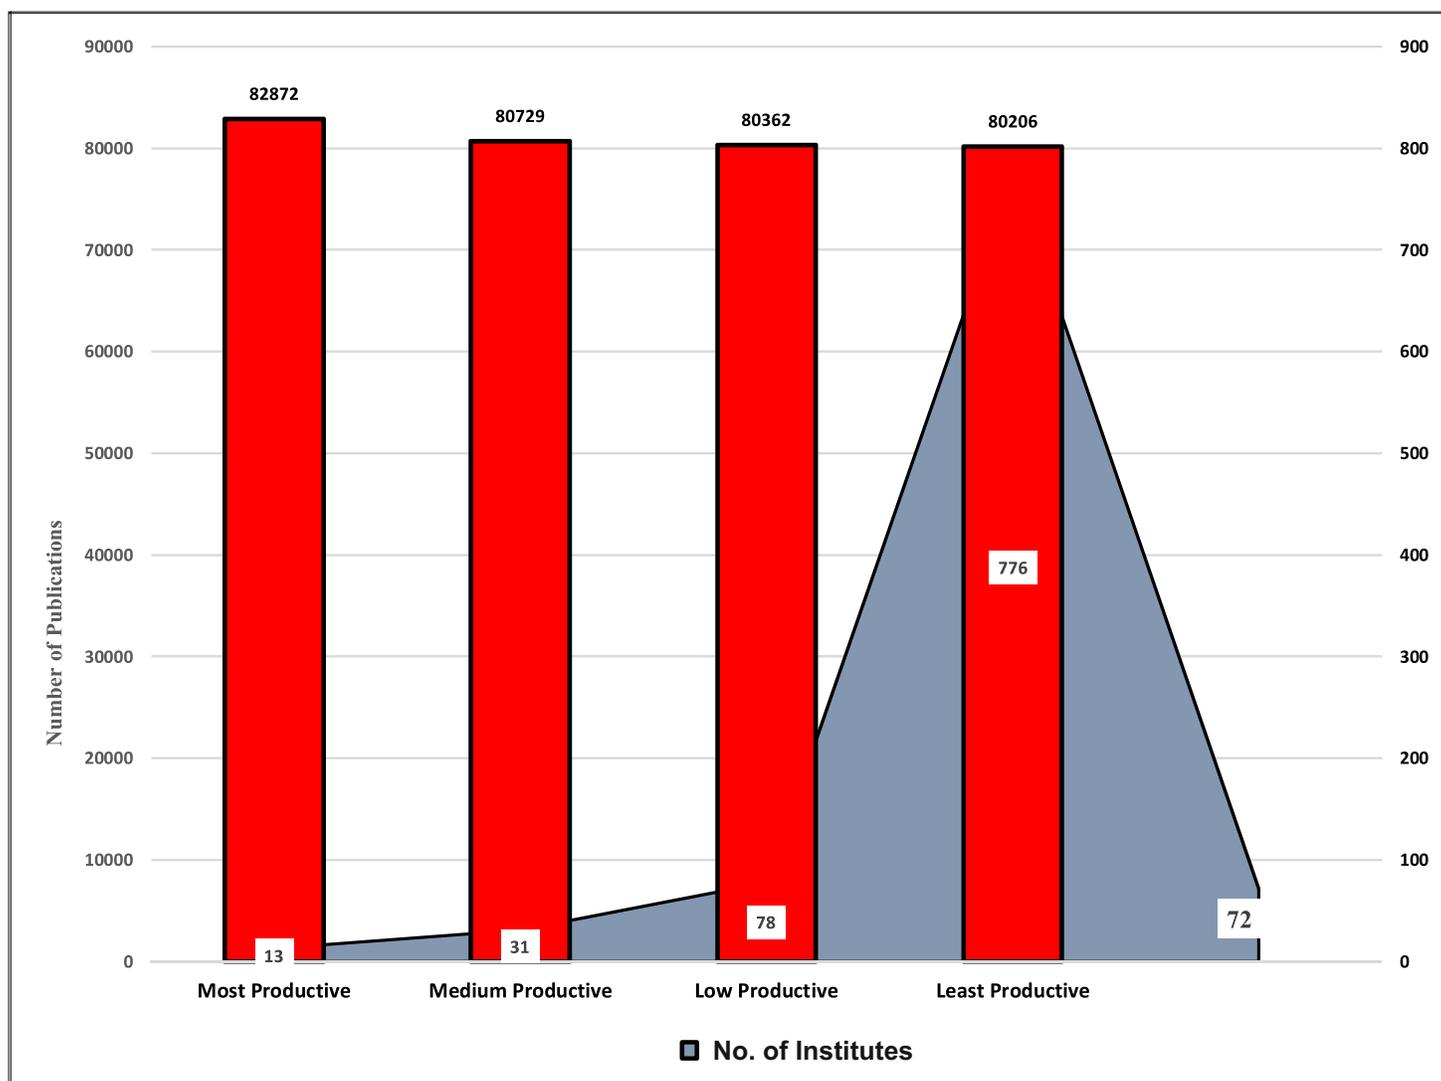

Categories / Domains	No. of Institutes/ Publications	Most Productive	Medium Productive	Low Productive	Least Productive	"0" Publications	Total
Overall	HEIs	13	31	78	776	72	970
	Publications	82872	80729	80362	80206	0	324169
Universities	HEIs	10	22	55	222		309
	Publications	51457	49143	50557	48917		200074
Research Institutions	HEIs	10	19	46	117		192
	Publications	76894	75082	74417	71196		297589
Engineering	HEIs	10	27	80	898	61	1076
	Publications	42319	43314	44173	44657	0	174463
Management	HEIs	6	12	26	204	355	603
	Publications	852	902	856	870	0	3480
Pharmacy	HEIs	8	17	38	227	43	333
	Publications	1359	1452	1457	1446	0	5714
Architecture	HEIs	1	2	4	11	51	69
	Publications	20	24	19	17	0	80
Medical	HEIs	2	7	17	66		92
	Publications	11560	10893	10919	9629		43001
Law	HEIs	2	3	5	12	41	63
	Publications	32	37	33	24	0	126
Dental	HEIs	7	10	20	71	6	114
	Publications	386	327	387	431	0	1531
Colleges	HEIs	25	60	120	540	364	1109
	Publications	3918	4072	3908	3767	0	15665

**Table 11. Comparative Research Output of Institutions in Various Categories and Domains: Least Productive to Most Productive Institutions**

Bradford, S.C. (1944). Sources of information on specific subjects. Engineering, 137, 1944, 85-86.

By applying Bradford's law to the research productivity of eligible institutions, institutions in various categories / domains can be categorised into the four groups, namely Most Productive, Medium Productive, Low Productive and Least Productive as shown below in Table 11.

As shown in the Table 11 given above, top 13 HEIs in Overall category (row 1) are most productive that contributed 82,872 articles followed by increasing number of HEIs in the remaining three categories contributing matching number of articles (approximately). It may be noted that the Least Productive 776 HEIs in Overall category contributed 80,206 articles, i.e. equivalent to 13, 31 and 78 HEIs in the previous groups. Similar observations can be made in all other categories and subject domains. Fig. 10 is pictorial representation of number of research publications in Overall categories categorised in four groups, i.e. Most Productive, Medium Productive, Low Productive and Least Productive.

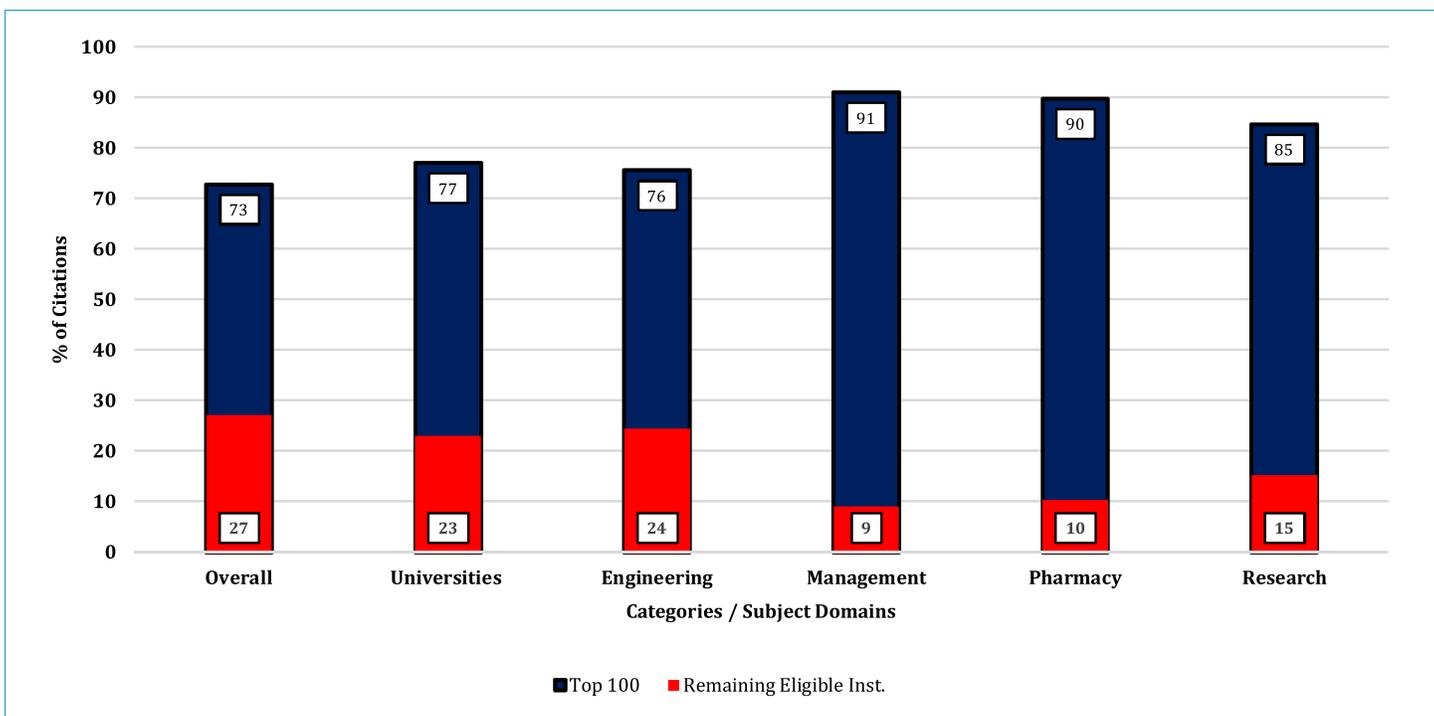

**Fig. 10: Comparative Research Output on Institutions in Overall Category: Least Productive to Most Productive Institutions**

### 7.2.3. Comparing Highly Cited Publications (HCP) of Top 100 Institutions vs Rest of the Eligible Institutions in Various Domains / Categories

Table 12 and Fig. 11 summarise total number of highly cited publications (HCP) for various categories and subject domains of India Rankings 2021. Table 12 and Fig. 11 provide a comparison of HCP of top 100 institutions with the rest of the eligible institutes in the same discipline / category. As in case of publications, 75.54% of the HCP come from the top 100 engineering institutions with remaining 976 participating and eligible engineering institutions contributing only 24.46% of HCP (row 3). Similar observations can be made in case of Overall category. However, in case of Management and Pharmacy, 90.96% and 89.73% HCP is attributable to the first 100 institutions respectively.

No. of Eligible Inst.	Discipline / Categories	Total Number of Highly Cited Publications	Highly Cited Publications of Top 100 Institutions	Highly Cited Publications of Remaining Institutions	% of Citations	
					Top 100 Institutes	Remaining Institutes
970	Overall	60318	43925	16393	72.82	27.18
309	Universities	36225	27888	8337	76.99	23.01
1076	Engineering	28603	21608	6995	75.54	24.46
603	Management	874	795	79	90.96	9.04
333	Pharmacy	1052	944	108	89.73	10.27
192	Research	54120	45854	8266	84.73	15.27

**Table 12: Highly Cited Publications of Top 100 Institutions as Compared to the Rest of the Eligible Institutions in Various Disciplines / Categories**

**Fig. 11: Highly Cited Publications of Top 100 Institutions as Compared to the Rest of the Eligible Institutions in Various Disciplines / Categories**

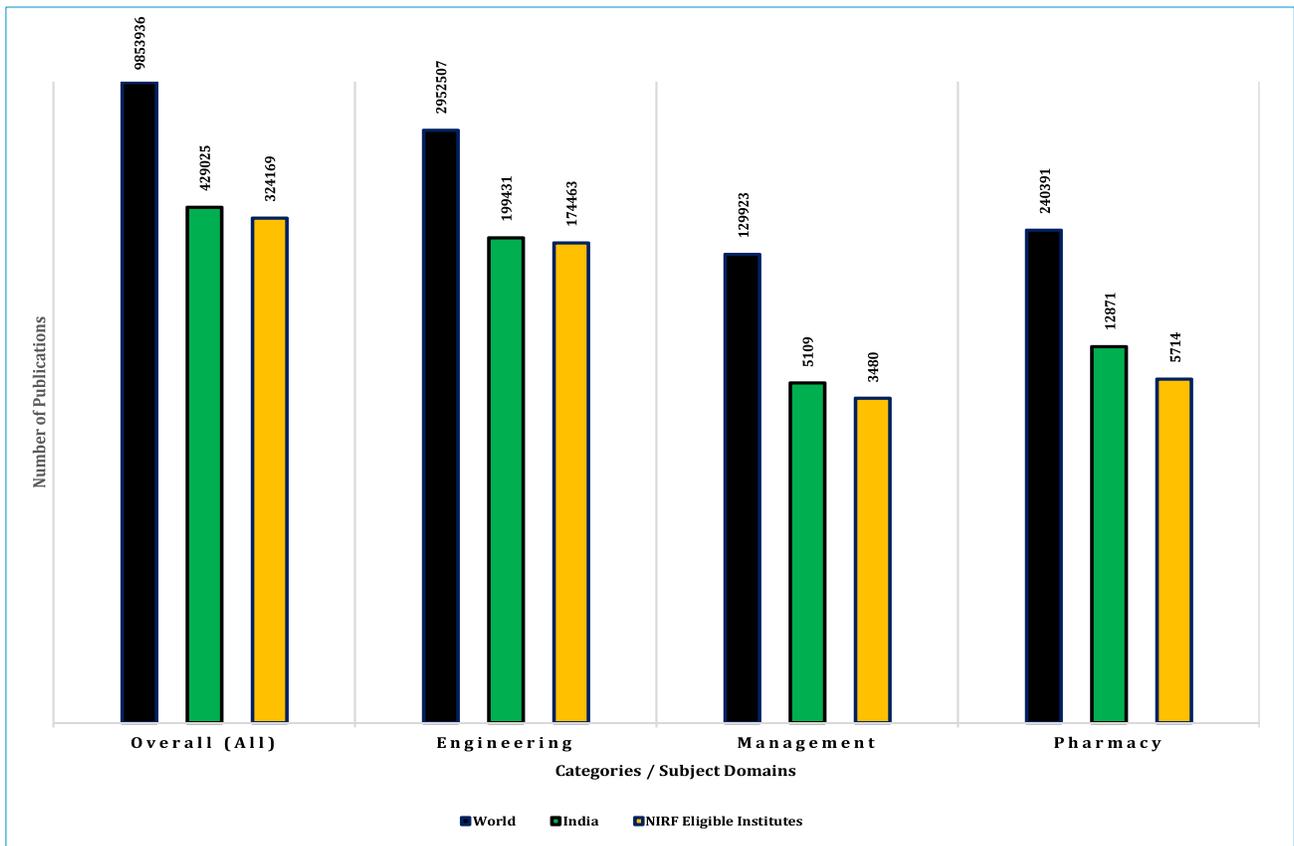

## 7.2.4. Comparing Research Publications of India, the World and Eligible Institutions in Various Domains / Categories

As a useful point of reference, Table 13 and Fig. 12 show the relative numbers of publications from India as compared to that of the World and eligible institutions in the respective categories. The following facts are apparent:

- i) Indian share of the overall world publications is about 4.35%. In the Management discipline, the share falls to about 3.93%.
- ii) 75.56% of the scholarly output from India comes from eligible institutions in Overall Category. In fact, it can be safely concluded that this would be close to (if not equal to) the total scholarly output from the academic world from India.
- iii) In Engineering discipline, India's contribution to the World publications is 6.75% (higher by 2.40% than Overall category), and 87.48% of publications in Engineering discipline comes from eligible institutions in India Rankings.
- iv) In case of Pharmacy, India's contribution to the World publications is 5.35% (higher by 1.00% than Overall category). However, only 44.39% of publications in Pharmacy comes from eligible institutions in India Rankings which indicate towards existence of a sizable pharmaceutical industry in the country that is active in research as well as in publication of their research output in peer reviewed journals.

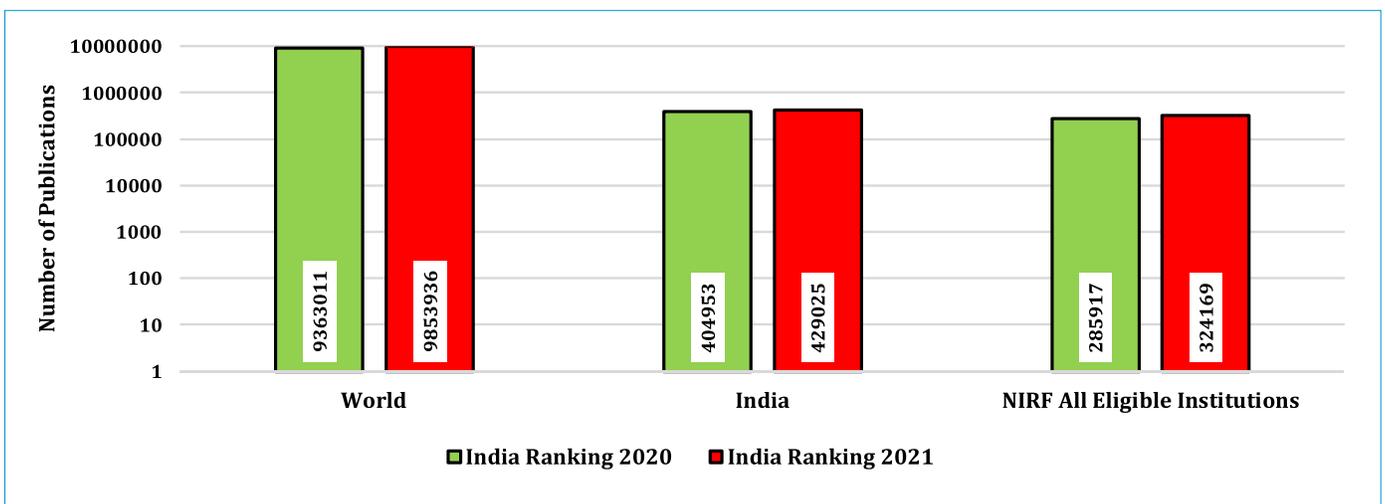

Discipline / Category	No. of Research Publications		
	World	India	Eligible Institutions
	(1)	(2)	
Overall (All)	9853936	429025 4.35% of (1)	324169 75.56% of (2)
Engineering	2952507	199431 6.75% of (1)	174463 87.48% of (2)
Management	129923	5109 3.93% of (1)	3480 68.12% of (2)
Pharmacy	240391	12871 5.35% of (1)	5714 44.39% of (2)

**Table 13: Research Publications of Eligible Institutions in Comparison to Total Research Publications of the World and India**

**Fig. 12: Research Publications of Eligible Institutions in Comparison to Total Research Publications of the World and India (On a Logarithmic Scale)**

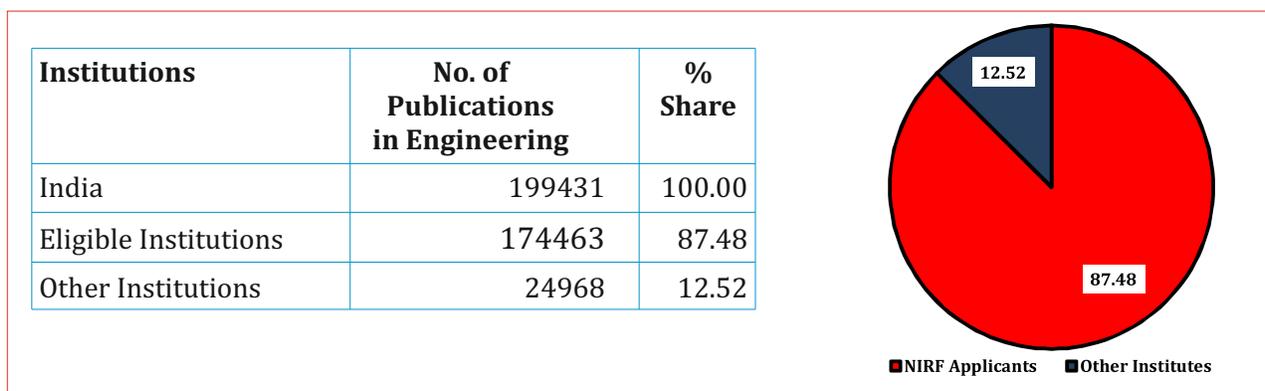

Fig. 13 compares number of research publications in world, India and Eligible Institutions for the years applicable for India Rankings 2020 and 2021. The total number of publications in the World registered an increase of 3.68% and 5.24% in the years corresponding to India Rankings 2020 and India Rankings 2021 respectively. In comparison, number of research publications of India for the corresponding period registered an increase of 5.51% and 5.94% respectively in Overall category.

**Fig. 13: Comparative Research Publications of World, India and Eligible Institutions in Overall Category**

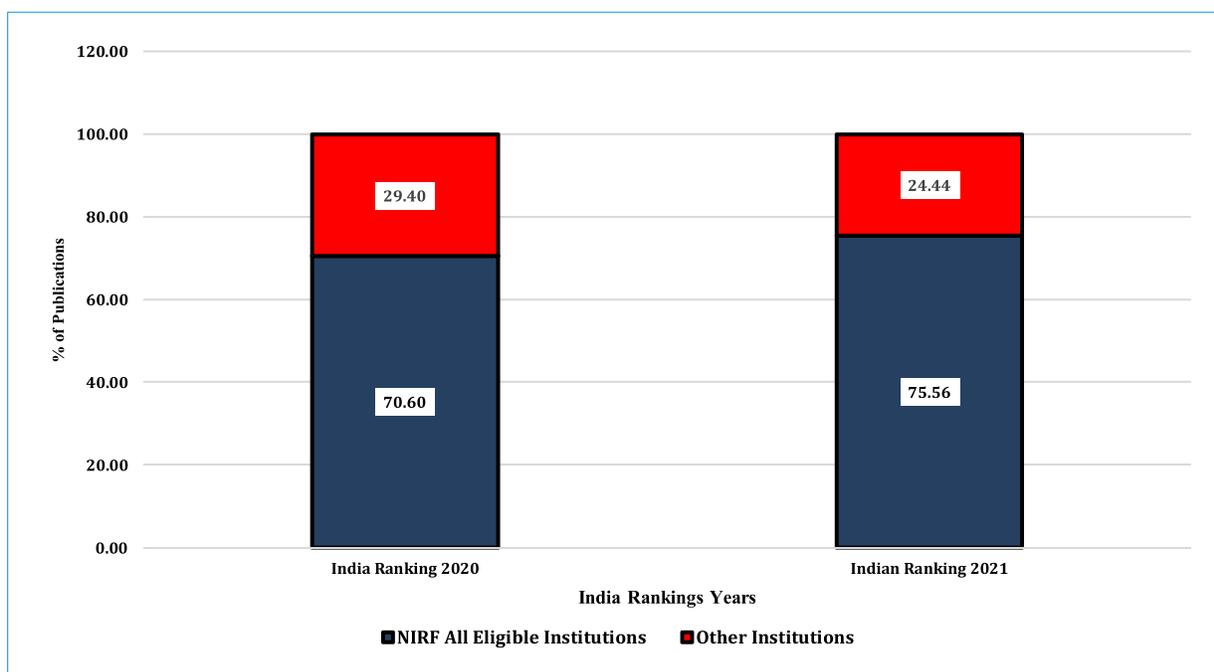

### 7.2.5. India's Total Publications Vs Publications of Eligible Institutions in Engineering

Table 14 and Fig. 14 indicate that a major part of the productive engineering institutes are part of the India Rankings 2021 that accounts for 87.48% of total publications. This demonstrates the high-quality participation and aspiration of quality institutions for the NIRF ranks, which is very gratifying. It seems from this Figure, though, that a significant part of research fraternity (12.52%) may be unrepresented. This conclusion, however, is likely to be faulty, since there are a good number of Research Labs, belonging to the CSIR System, the DAE system, ISRO and private research labs who also publish significantly in Engineering, and do not form part of the mainstream academic system in India.

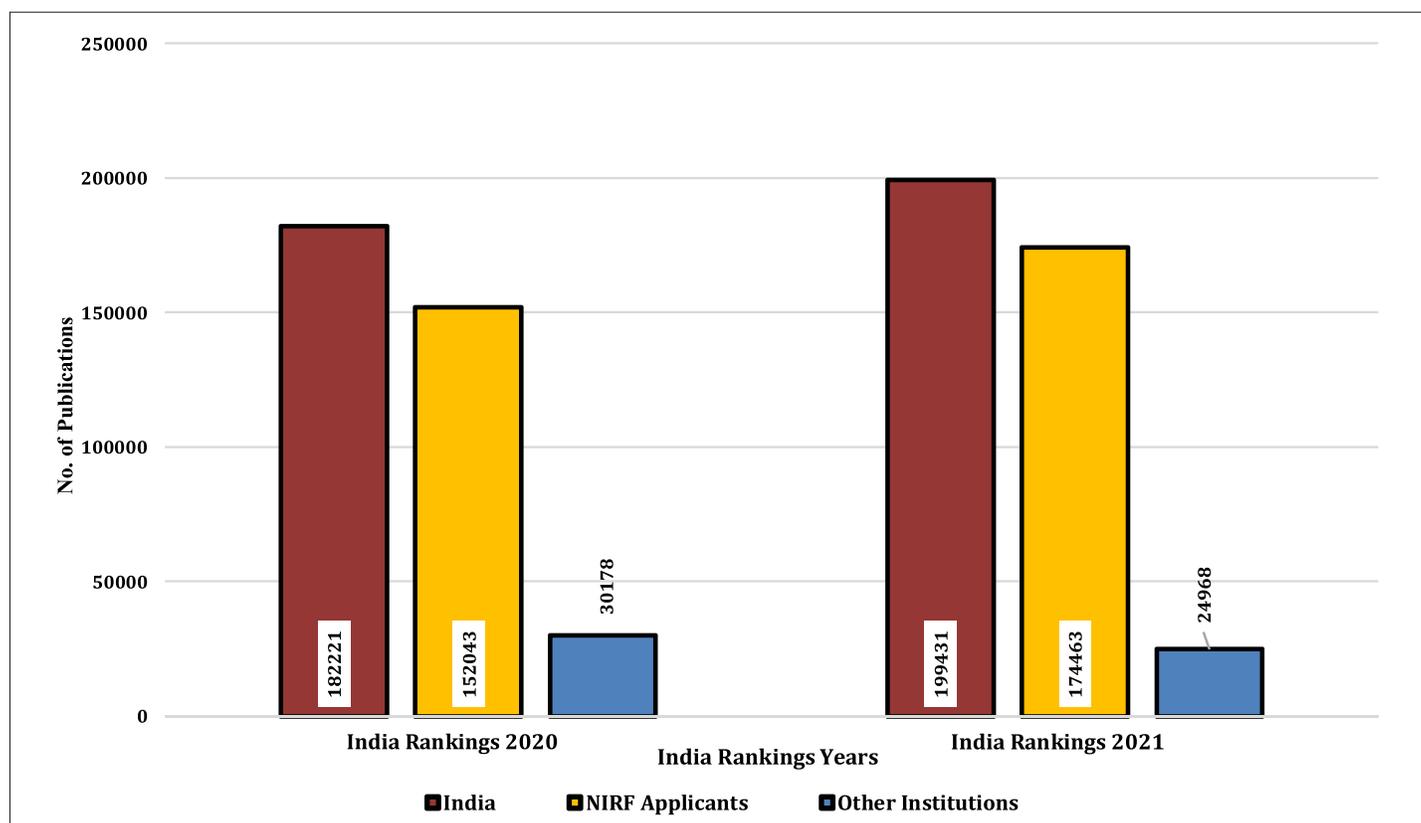

**Table 14 and Fig. 14: % Share in India's Total Publications Vs Publications of Eligible Institutions in Engineering**

It can also be observed from Fig. 15 that total research publications of eligible institutions for the years applicable for India Rankings 2020 and 2021 constitute 70.60% and 75.56% of total India's research publications respectively in the Overall Category.

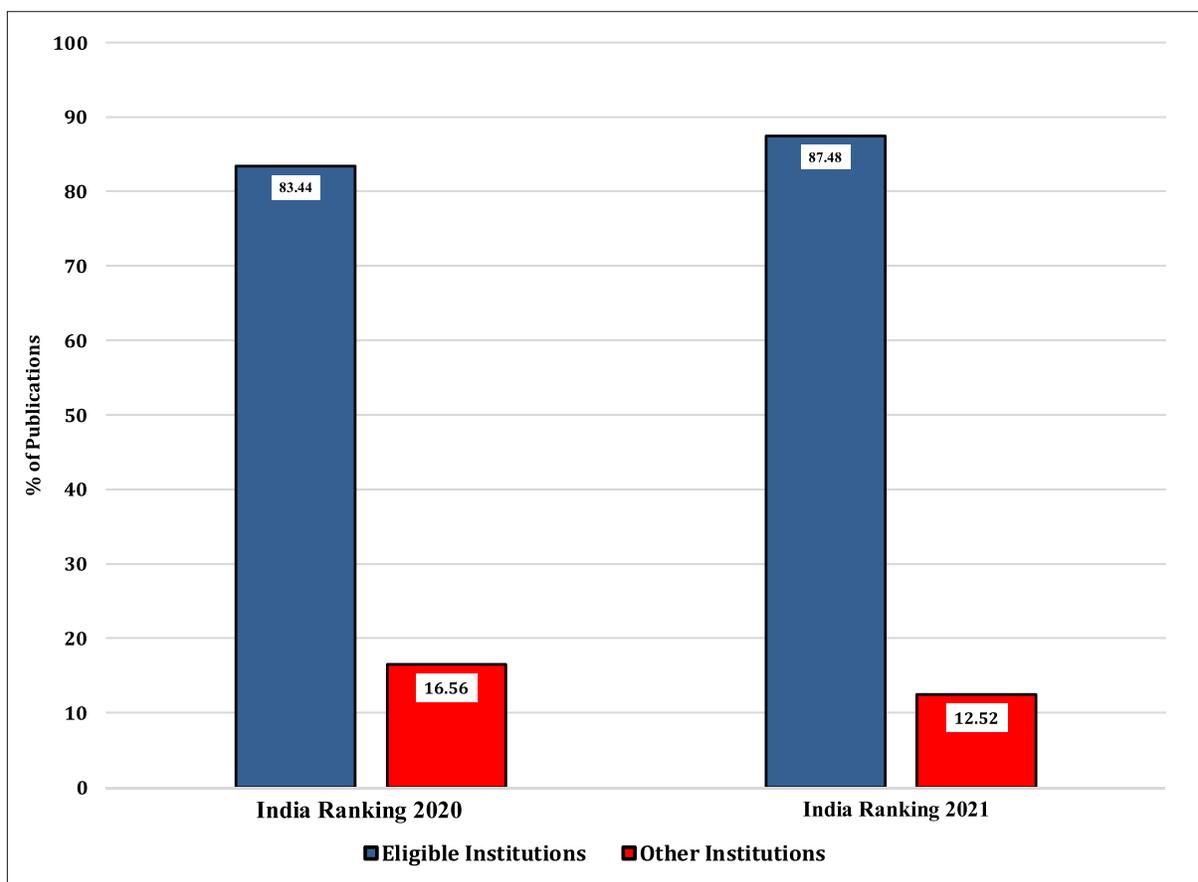

**Fig. 15: Total Publications of India: Eligible Institutions and Other Institutions in the Overall Category**

Fig. 16 presents similar comparison for the Engineering category for the years applicable for India Rankings 2020 and 2021. Number of publications from entire India increased by 9.44% for years corresponding to India Rankings 2021 over publications corresponding to India Rankings 2020. In corresponding period, number of research publications of eligible institutions increased by 14.75% whereas for other institutions registered a decrease of 17.26% during the same period. Decrease in contributions from non-applicant institutions is an indirect indication of greater participation of eligible institutions in the ranking exercise. This trend may continue in coming years as new domains / categories are added to the India Rankings. On other hand, increase in publications from India as well as from eligible institutions can also be attributed to increased emphasis on publications in quality journals.

**Fig. 16: Comparative Research Publications of India, Eligible Institutions and Other Institutions in Engineering for India Rankings 2020 and 2021**

It can also be observed from Fig. 17 that total research publications of eligible institutions for the years applicable for India Rankings 2020 and India Rankings 2021 constitute 83.44% and 87.48% of total India's research publications in the field of Engineering.

**Fig. 17: Total Publications of India: Eligible Institutions and Other Institutions in Engineering**

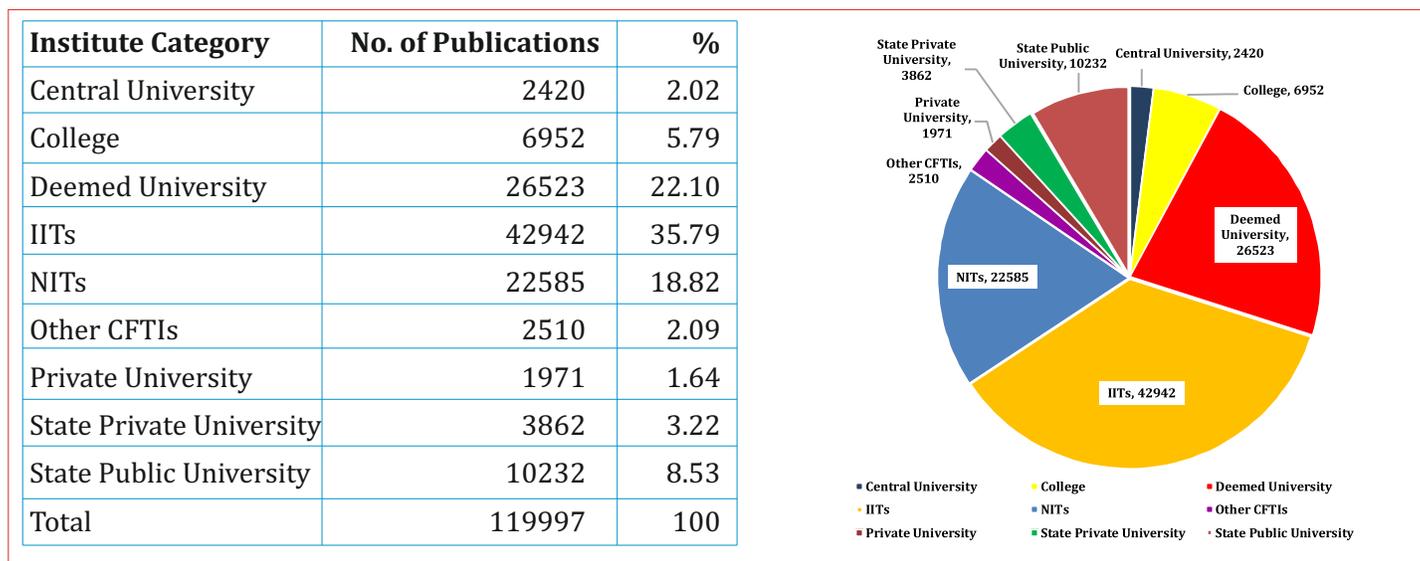

It may also be noted that a significant number of eligible institutions have no publications at all as revealed in Table 15. It is noteworthy that 335 management institutions (out of 609 eligible applicant institutions) and 364 colleges (out of 1109 eligible applicant colleges) have “0” publication. This is not surprising since many of these see their primary role in undergraduate education (colleges) and to a lesser extent, the focus is on “case studies” rather than on research publications in case of management institutions.

No. of Applicant Inst.	Discipline / Category	No. of Institutions having “0” Publications	%
970	Overall	72	7.42
1076	Engineering	61	5.67
609	Management	335	55.01
333	Pharmacy	43	12.91
1109	Colleges	364	32.82

**Table 15: Number and % of Eligible Institutions having “0” Publications**

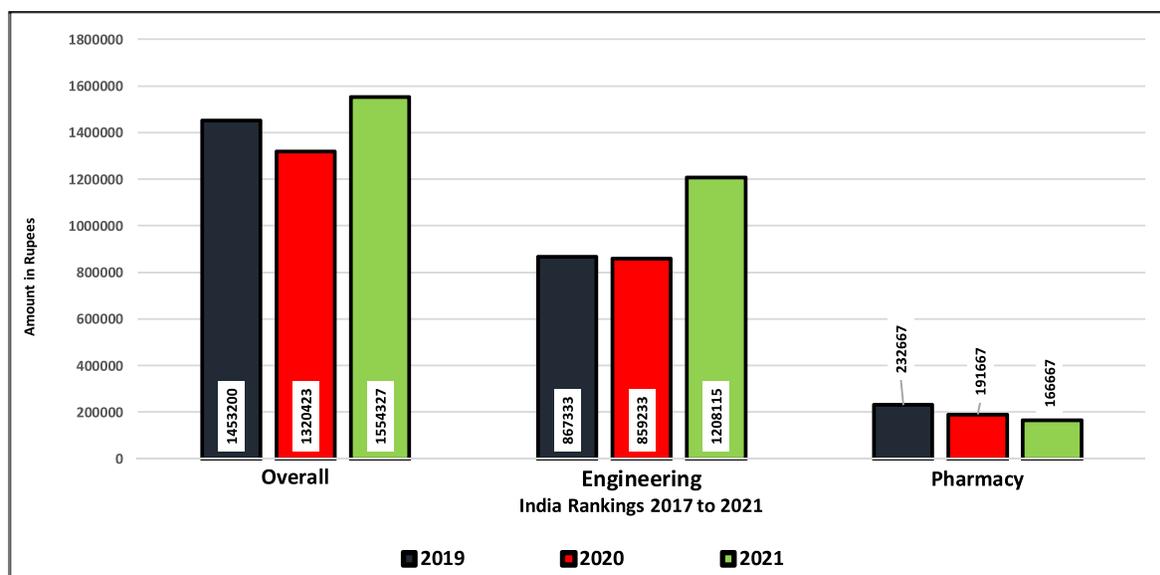

### 7.2.7. Publications Share from top 100 Highly Productive Engineering Institutions

Furthermore, a deeper look at one of the larger disciplines, viz., Engineering shows that percentage share of publications of different types of institutions amongst the top 100 ranked institutions in terms of research articles published in this domain reveals that IITs take the lion's share with nearly 35.79% of the Engineering publications to their credit followed by 22.10% by deemed-to-be-universities and 18.82% by NITs as shown in Table 16 and Fig. 18. There is, at the same time, a good sprinkling in all categories of participating institutes. This clearly augurs well for the research productivity in the engineering domain.

**Table 16 and Fig. 18: Share of Publications from top 100 Highly Productive Engineering Institutions**

Fig. 19 plots median sponsored research funding availed by the NIRF participants in three categories, i.e. Overall, Engineering and Pharmacy for the years 2019, 2020 and 2021. While decrease in funding was observed in all the three categories in India Rankings 2020 in comparison to India Rankings 2019. However, as per the data available from eligible institutions for India Rankings 2021, the amount of median sponsored research has registered an increase of 6.96% and 39.29% in case of Overall and Engineering category respectively from 2019 to 2021. In contrast, decrease of 28.37% is registered from 2019 to 2021 in case of Pharmacy.

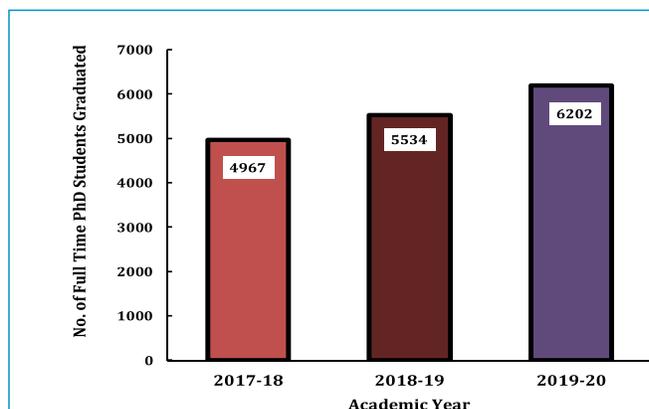

**Fig. 19. Comparison of Sponsored Research Funding: India Rankings 2019, 2020 and 2021**

### 7.3. Graduation Outcome

Table 17 and Fig. 20 provide number of full-time Ph.D. students who graduated from 1076 eligible engineering institutions in the academic year 2019-20. It can be observed that percentage of increase in Ph.D. awarded was 11.42% and 12.07% in the academic years 2018-19 and 2019-20 respectively.

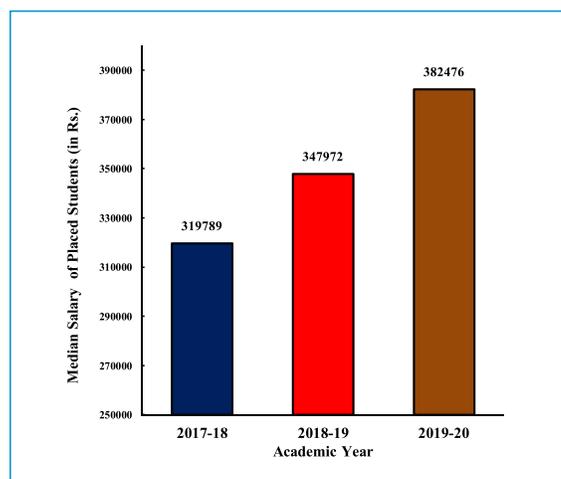

Academic Year	No. of Full-time Ph.D. Students Graduated	% Increase
2017-18	4967	
2018-19	5534	11.42
2019-20	6202	12.07
Total	16703	

**Table 17 and Fig. 20: Increase in Number of Ph.D Graduated during Academic Years 2017-2018, 2018-2019 and 2019-2020 in Engineering**

Table 18 and Fig. 21 provide average salary of engineering graduates during Financial Years 2017-18, 2018-19 and 2019-20. Increase of 8.81% and 9.92% in median salary can be observed in the Financial Years 2018-19 and 2019-20 respectively.

Academic Year	Average Salary of Placed Students	% of Increase
	Amount in Rupees	
2017-18 (IR 2019)	319789	
2018-19 (IR 2020)	347972	8.81
2019-20 (IR 2021)	382476	9.92

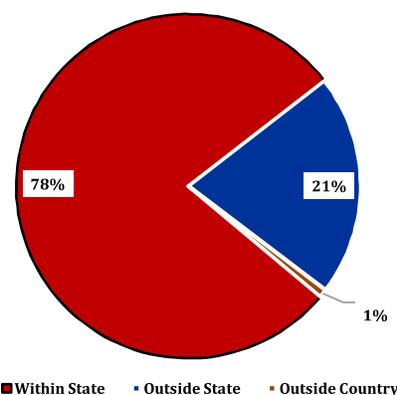

**Table 18 and Fig. 21: Average Salary of Students in Engineering Institutions in Academic Years 2017-18 to 2019-20**

### 7.4. Outreach and Inclusivity

Table 19 and Fig. 22 reveal regional diversity in enrolment in eligible engineering institutions. It may be noted that while 78.38% of students were enrolled from within the state, 20.84% of students came from other states and less than 1% students were from outside the country. 19,722 students (0.79%) from outside the country were studying in 330 institutions.

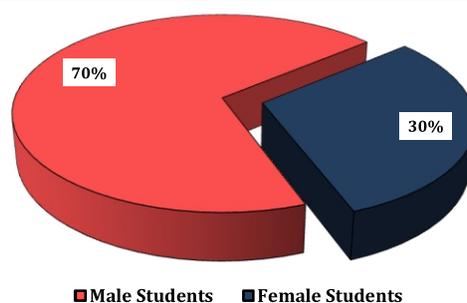

Academic Year 19-20	No. of Students (all programs)	%
Within State	1934462	78.38
Outside State	514302	20.84
Outside Country	19389	0.79
Total No. of Students	2468153	

**Table 19 and Fig. 22: Regional Diversity: No. and Percentage of Students from Outside State and Country in Engineering (All Programs) during Academic Year 2019 - 20**

Table 20 and Fig. 23 provide data on gender diversity among students enrolled in different programs in engineering discipline during the academic year 2019 - 2020. Of total 24,68,153 students enrolled in different engineering programs, 17,16,252 (69.54%) were male and 7,51,901 (30.46%) were females.

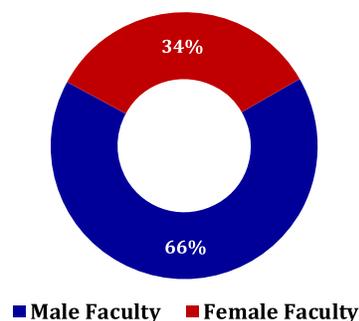

Gender	No. of Students	%
Male	1716252	69.54
Female	751901	30.46
Total	2468153	

**Table 20 and Fig. 23: Gender Diversity amongst Students: Male vs Female Enrolment in Engineering in Academic Year 2019 - 20**

Table 21 and Fig. 24 plot data on gender diversity among faculty in engineering institutions. Of total 1,43,211 faculty, 94,875 (66.25%) were males and 48,336 (33.75%) were females.

Gender of Faculty	Number of Faculty	%
Male	94875	66.25
Female	48336	33.75
Total No. of Faculty	143211	

**Table 21 and Fig. 24: Gender Diversity amongst Faculty: Male vs Female Faculty in Engineering in Academic Year 2019 - 20**

## 7.5. Perception

Fig. 25 and 26 depict the vote shares of peer and employer's perception for various categories of Institutions. It is interesting to note that maximum vote is picked up by the Overall, Engineering and College categories. On the other extreme, all other remaining subject categories, i.e. Law, Medical and Architecture continued with the trend of weak response from the peers. The subject category of Dental, ranked for the second time drew => 1% interest amongst peers and employers. This might be an indication towards requirement for expansion of database of Peers and Employers in these fields.

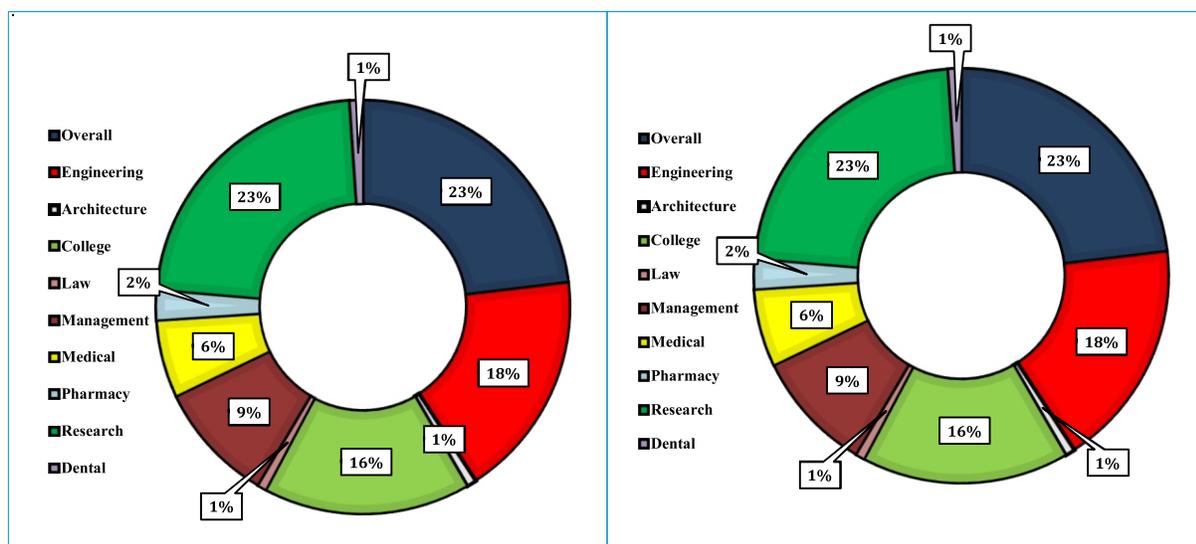

Fig. 25 and Fig. 26: Peer and Employer's Perception

## 7.6. Rank Order Correlations Across Parameters

Table 22 given below provides value of Spearman's Rank Order Correlation Coefficient between ranks of institutions based on its total score with that of its rank based on research performance in various categories and subject domains. As mentioned before, data for research performance is taken from third-party independent sources, namely Web of Science. Fig 27 to Fig. 32 depict the mean of the scatter plots of corresponding scores along the two axes for various categories and subject domains. A strong and positive correlation can be noticed for each discipline except for colleges. The strong correlation between ranking by research performance based on data from third-party independent sources and overall ranking vouch for authenticity of data collected from institutions.

Category / Subject Domain	Spearman Rank Correlation Coefficient (r)	Coefficient of Determination (R <sup>2</sup> )
Overall	0.84	0.70
University	0.79	0.63
Engineering	0.89	0.79
Management	0.80	0.64
Pharmacy	0.85	0.72
College	0.50	0.25

Table 22: Spearman Rank Correlation Coefficient (r) for Various Categories and Subject Domains

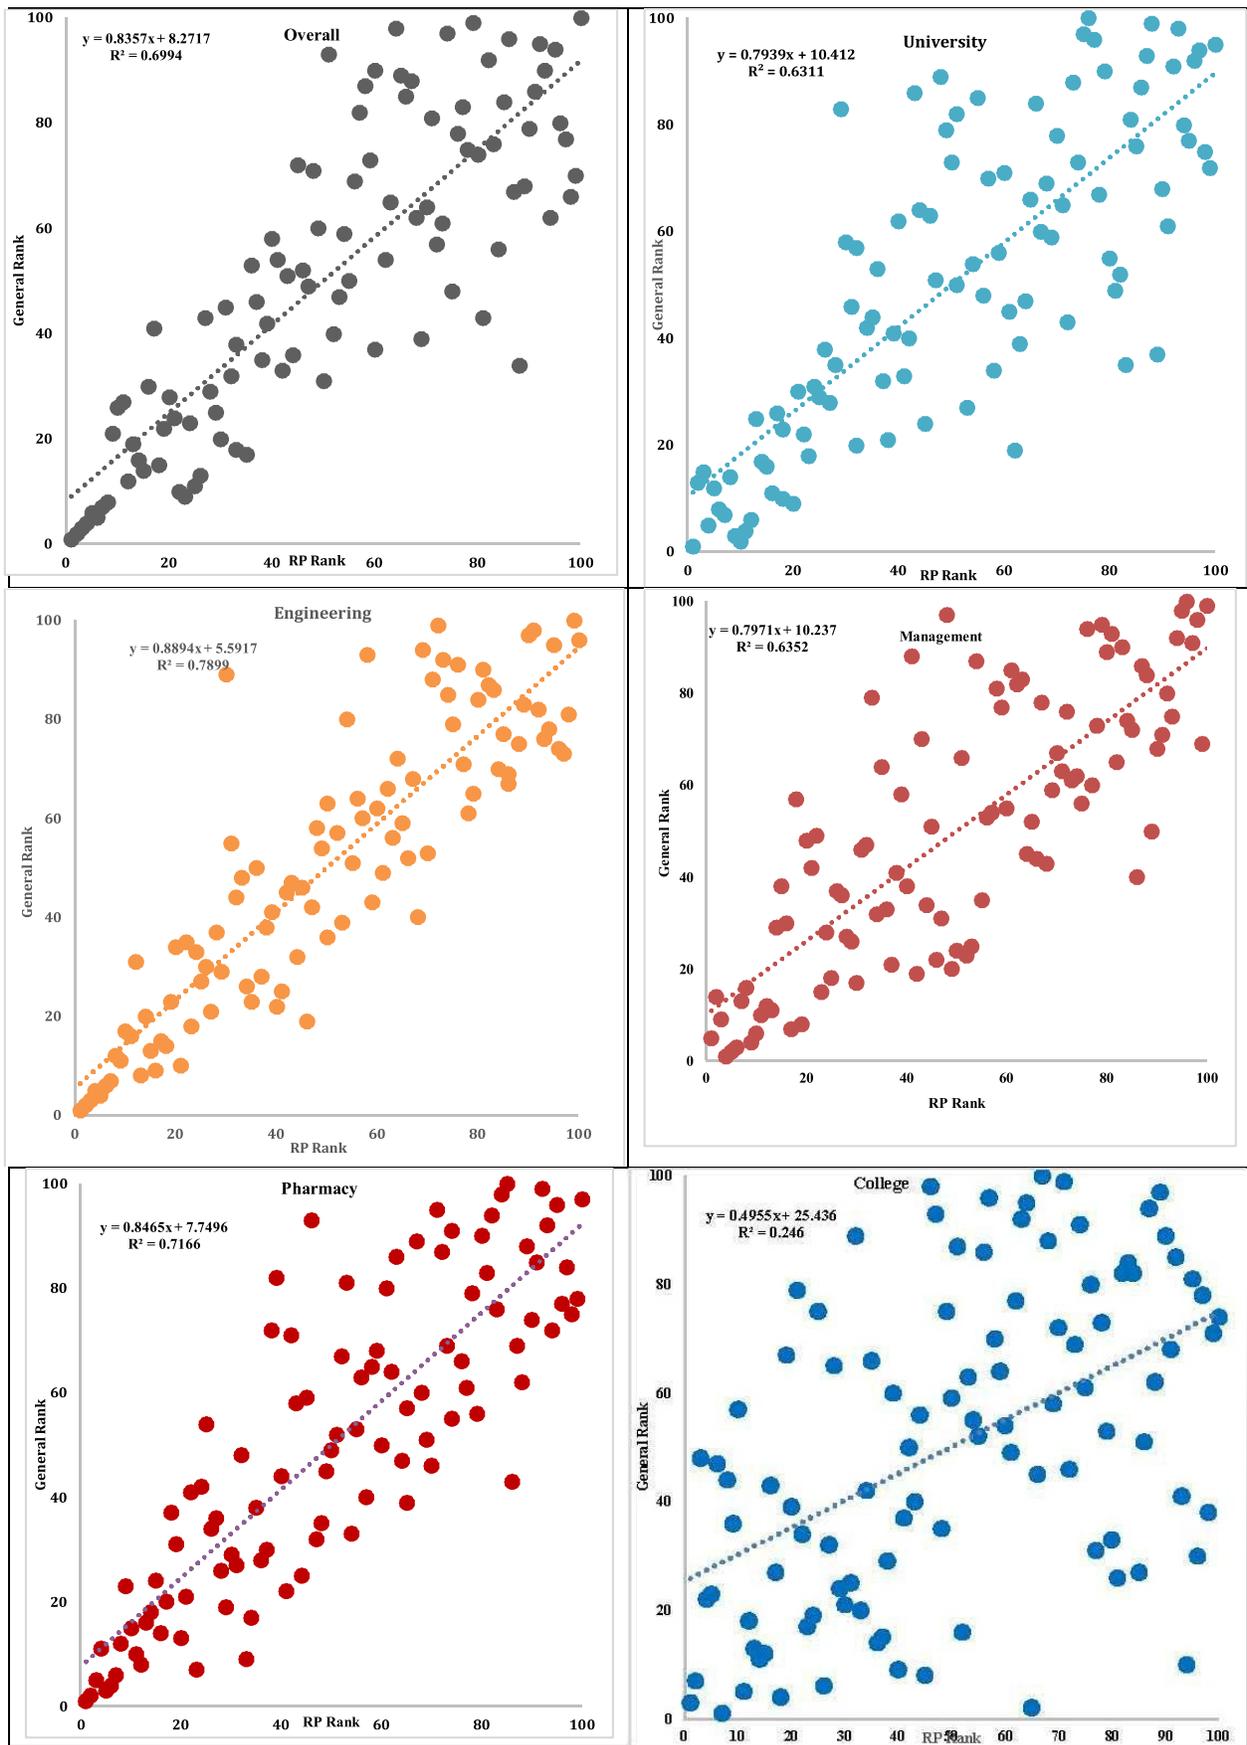

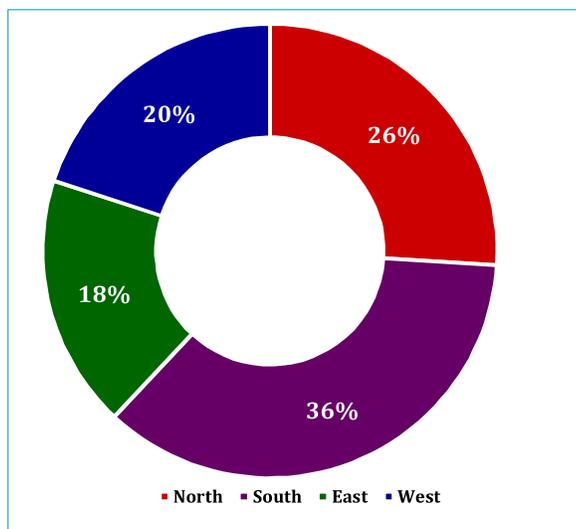

Fig. 27 to Fig. 32: Correlation between Ranks by Research Performance and All Other Parameters for Different Categories and Subject Domains

## 7.7. Regional Outlook

Fig. 33 depicts that there is a good regional balance of institutes, although this picture can change with redefinition of the regions. The maximum participation comes from Southern part of India that hosts larger number of institutions of higher education.

**Fig. 33: Region-wise Distribution of Ranked Institutions in Overall Category**

## 8. Six Years of India Rankings and its Impact on Performance Parameters of Educational Institutions

India Rankings is an annual exercise that ranks institutions of higher education in various categories and subject domains using National Institutional Ranking Framework (NIRF). The maiden edition of India Rankings was released in April 2016 soon after unveiling of NIRF in September 2015. Subsequently, India Rankings was released in the month of April in the years 2017, 2018 and 2019. The fifth edition of India Rankings was released virtually on 11th June 2020. The sixth and the latest edition of India Rankings is being released virtually on 9<sup>th</sup> September 2021.

Parameters identified under NIRF were used for ranking of all the sixth editions of India Rankings from 2016 to 2021. However, some of the sub-parameters had to be dropped due to serious lack of reliability and consistency of data from applicant institutions and a few new parameters were added for domain-specific as well as for category-specific ranking of institutions. These major changes were introduced from 2017 onwards. As such, most of the analysis is done on five year's data taken from India Rankings 2017 to India Rankings 2021.

An analysis of data on five years of India Rankings provides an interesting insight into impact of India Rankings on performance parameters of institutions of higher education. It is indeed evident that these institutions are making strenuous effort to improve their performance on various parameters or sub-parameters identified under NIRF with an aim to improve their ranking. Some of the noteworthy observations based on analysis of six years of data on various ranking parameters, are reported here.

### 8.1. Participation

India Rankings (NIRF) has attracted participation of institutions of higher education from across India in all categories and subject domains. It is evident that the number of participating institutions has increased every year in almost all

categories and subject domains as shown in Table 23. While number of unique institutions have registered an increase of 66.12% from 2,426 in 2016 to 4,030 in 2021, the maximum increase of 236.82% has been in the College category with increase from 233 colleges in 2016 to 1802 colleges in 2021 as shown in Table 23.

Year	Unique Institutes	Overall	Univer-sity	Engg.	Manage-ment	Phar-macy	Archit-ecture	College	Medi-cal	Law
2016	2426	-	233	1438	609	454	28	803	-	-
2017	2411	724	278	919	542	316	42	535	43	49
2018	2809	957	321	906	487	286	59	1087	101	71
2019	3127	1479	296	970	555	301	65	1304	113	80
2020	3771	1667	335	1071	630	334	48	1659	118	97
2021	4030	1657	362	1143	659	351	78	1802	111	120

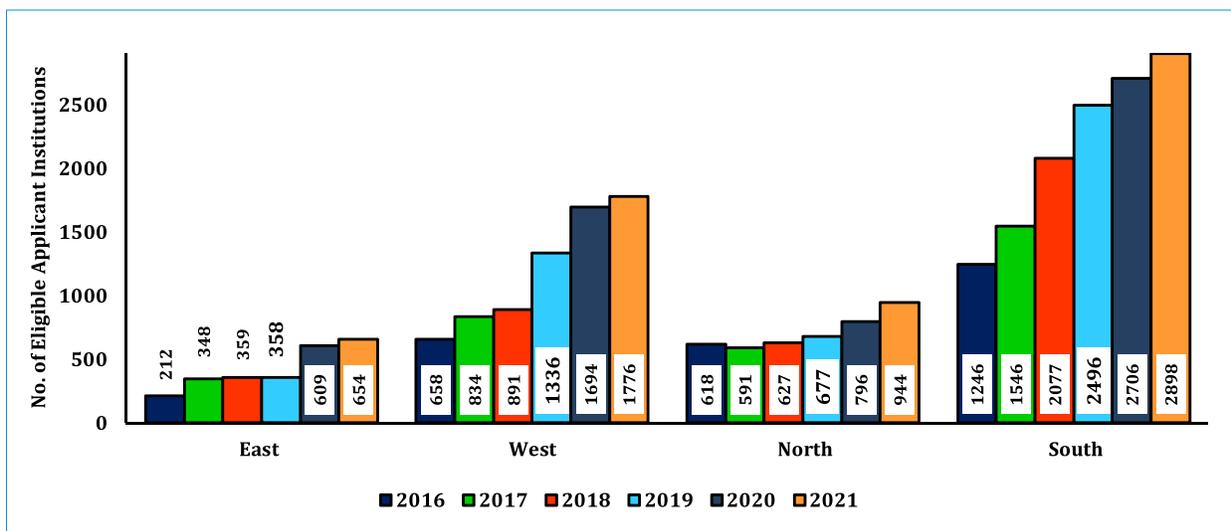

**Table 23: Participation Numbers for Various Categories and Subject Domains from India Rankings 2016 to India Rankings 2021**

Table 24 and Fig. 34 provide regional distribution of eligible institutions. The number of eligible institutions from southern region is obviously the largest (46.21% in 2021) in all the 5 years of “India Ranking” i.e. for 2016 to 2021 followed by institution in Western region and Northern region. Institutions in eastern region account for minimum number of applicants (10.43% in 2021) in “India Rankings”. However, institutions in Eastern region have registered the maximum growth in terms of number of institutions which grew from 212 in 2016 to 654 in 2021 with growth of 208.49%, followed by Institutions in Western region with growth of 169.91% over a period of six years.

It may also be noted that the largest number of institutions are located in southern region of India followed by institutions in western region and northern region with eastern region hosting the least number of institutions as per statistics maintained by the AICTE, AISHE and UGC.

Year	East	West	North	South	Total
2016	212	658	618	1246	2734
2017	348	834	591	1546	3319
2018	359	891	627	2077	3954
2019	358	1336	677	2496	4867
2020	609	1694	796	2706	5805
2021	654	1776	944	2898	6272
% (2021)	10.43	28.32	15.05	46.21	100.00
% Increase (from 2016 to 2021)	208.49	169.91	52.75	132.58	

**Table 24: Regional Distribution of Applicant Institutions from India Rankings 2016 to India Rankings 2021**

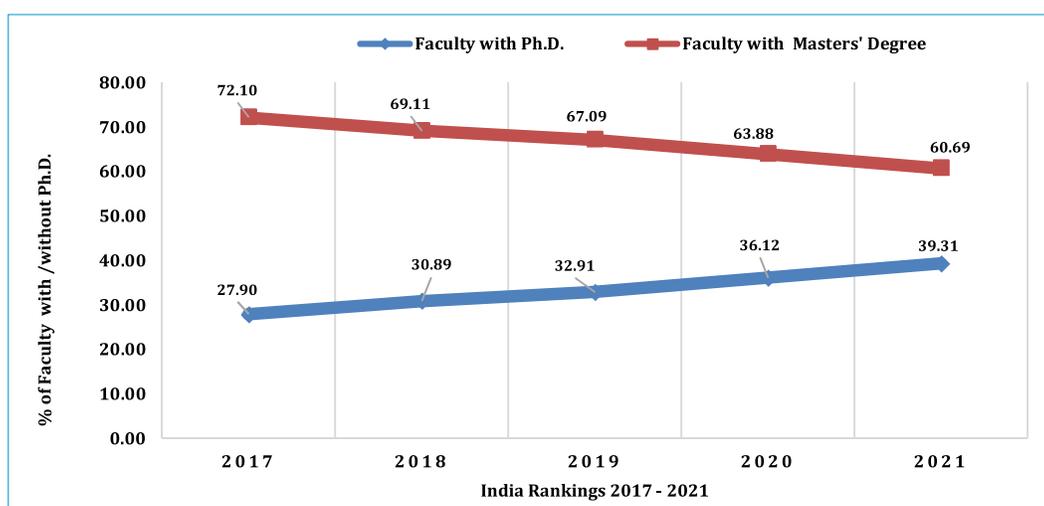

**Fig. 34: Regional Distribution of Participating Institutions from 2016 - 2021**

## 8.2. Teaching Learning and Resources

Qualifications and experience of faculty is identified as one of the important performance parameters under Teaching, Learning and Resources under NIRF. Table 25 to 27 and Fig. 35 to 37 provide an interesting insight into improvement in qualifications and teaching experience of faculty hired in Engineering institutions over a period of 5 years i.e. from 2017 to 2021. Table 25 and Fig. 35 depict that while faculty with Ph.D. has grown from 27.90% in 2017 to 39.31% in 2021, faculty with Master's degree registered gradual decline from 72.10% in 2017 to 60.69% in 2021.

Faculty	India Rankings Year (Academic Year)									
	2017 (2015-2016)		2018 (2016-2017)		2019 (2017-2018)		2020 (2018-2019)		2021 (2019-2020)	
	No. of Faculty	%	No. of Faculty	%	No. of Faculty	%	No. of Faculty	%	No. of Faculty	%
Faculty with Ph.D.	32309	27.90	34967	30.89	41690	32.91	48551	36.12	56300	39.31
Faculty with Masters' Degree	83477	72.10	78247	69.11	84981	67.09	85879	63.88	86911	60.69
Total Faculty	115786	100	113214	100	126671	100	134430	100	143211	100

**Table 25: Qualifications of Faculty in Engineering Institutions from 2017 to 2021**

**Fig. 35: Qualifications of Faculty in Engineering Institutions from 2017 to 2021**

Table 26, Table 27, Fig. 36 and Fig. 37 depict fluctuations in experience of faculty over a period of five years, i.e. 2017 to 2021 in engineering institutions. Table 26 and Fig. 36 depict that while faculty with upto 8 years of experience has decreased from 54.15% in 2015-16 to 37.22% in 2019-20, faculty with 8-15 years of experience and >15 years of experience have increased from 24.57% and 21.27% in 2015-16 to 32.45% and 30.33% in 2019-2020 respectively.

Experience in No. of Years	India Rankings Year (Academic Year)									
	2017 (2015-2016)		2018 (2016-2017)		2019 (2017-2018)		2020 (2018-2019)		2021 (2019-2020)	
	No. of Faculty	%	No. of Faculty	%	No. of Faculty	%	No. of Faculty	%	No. of Faculty	%
Faculty upto 8 Years of Experience	62699	54.15	55866	49.35	58199	45.95	55474	41.27	53307	37.22
Faculty with 8- 15 Years of Experience	28454	24.57	30609	27.04	36488	28.81	41561	30.92	46471	32.45
Faculty with >15 Years of Experience	24633	21.27	26739	23.62	31984	25.25	37395	27.82	43433	30.33
Total	115786	100	113214	100	126671	100	134430	100	143211	100

**Table 26: Experience of Faculty in Engineering Institutions from 2017 to 2021**

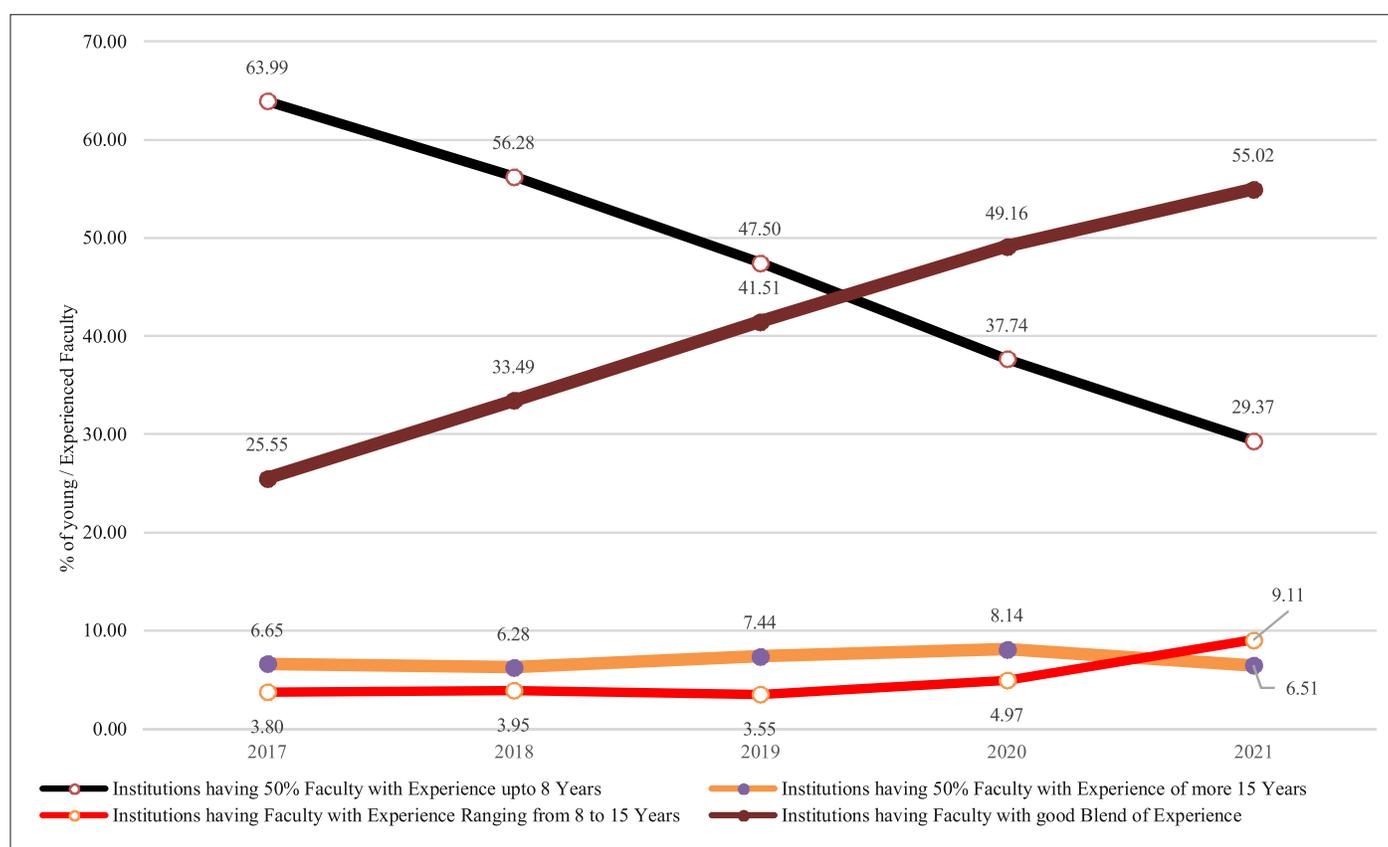

**Fig. 36: Experience of Faculty in Engineering Institutions from 2017 to 2021**

Table 27 and Fig. 37 below depict those institutions having 50% of young faculty have decreased from 63.99% in 2015-2016 to 29.37% in 2019-2020 whereas institutions having 50% faculty with experience of 8 to 15 years or having a good blend of experience have increased from 3.80% and 25.55% in 2015-2016 to 9.11% and 55.02% in 2019-2020 respectively. However, institutions having 50% faculty with more than 15 years of experience have remained almost static over a period of five year. This indicates that while younger faculty have gained experience over the years, most engineering institutions still lack experienced faculty.

Institutions and Experience of their Faculty	2017 (2015-2016)		2018 (2016-2017)		2019 (2017-2018)		2020 (2018-2019)		2021 (2019-2020)	
	No. of Faculty	%								
Institutions Having 50% of Faculty with Experience upto 8 Years	606	63.99	484	56.28	428	47.50	380	37.74	316	29.37
Institutions having 50% Faculty with Experience of more 15 Years	63	6.65	54	6.28	67	7.44	82	8.14	70	6.51
Institutions having 50% Faculty with Experience of 8 to 15 Years	36	3.80	34	3.95	32	3.55	50	4.97	98	9.11
Institutions having Faculty with Good Blend of Experience	242	25.55	288	33.49	374	41.51	495	49.16	592	55.02
Total	947	100	860	100	901	100	1007	100	1076	100

**Table 27: Young vs Experienced Faculty in Engineering Institutions from 2017 to 2021**

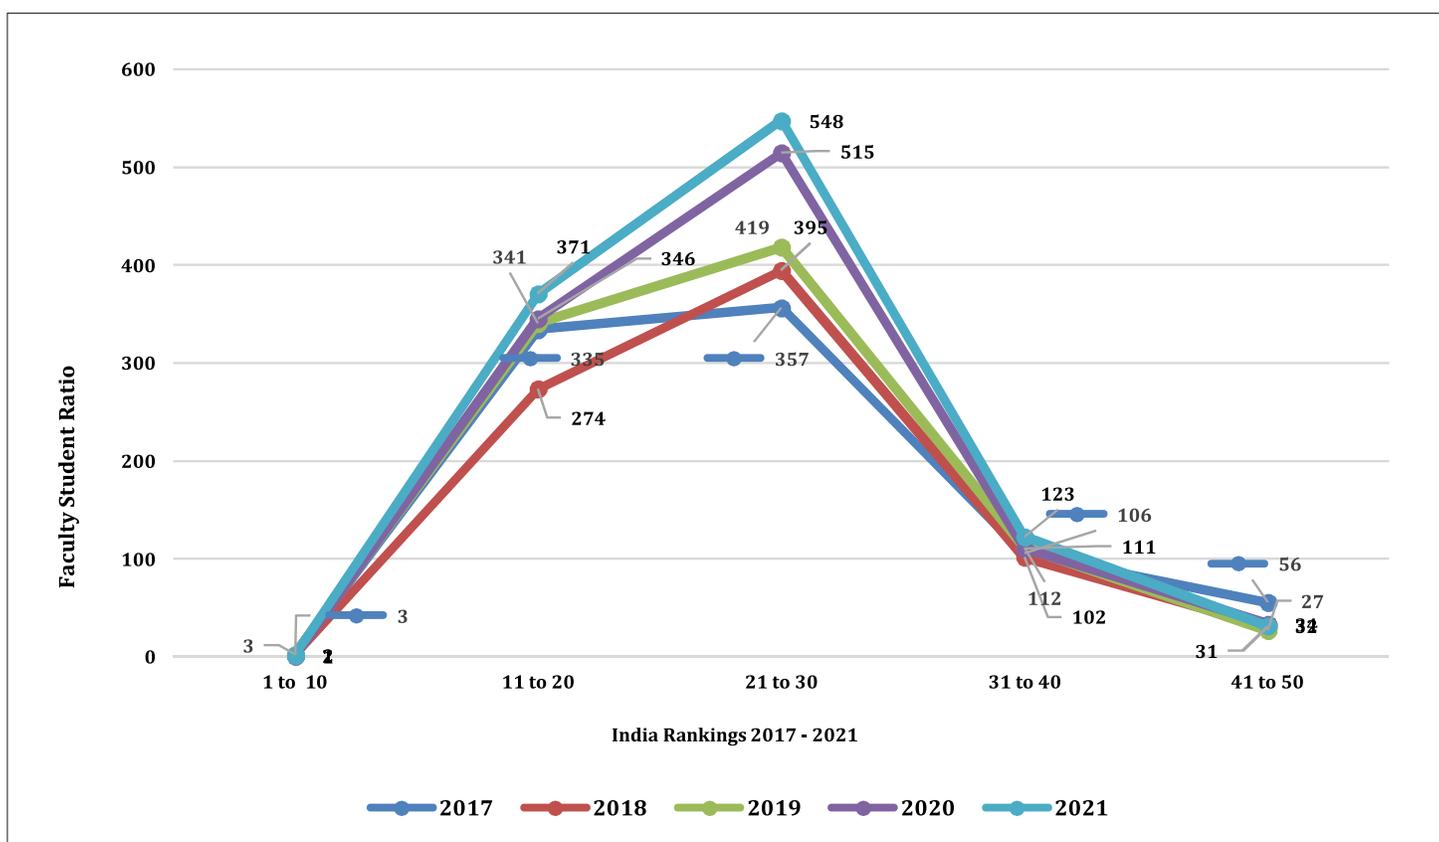

**Fig. 37: Young vs Experienced Faculty in Engineering Institutions from 2017 to 2021**

A close examination of faculty-student ratio (FSR) across eligible institutions in engineering category from 2017 to 2021 reveals that faculty-student ratio has improved over past five years, i.e. from 2017 to 2021. As shown in Table 28 and Fig. 38, while only 1 to 3 institutions qualified for FSR of 1 to 10 between 2017 and 2021, number of institutions who qualify for FSR in three ranges, i.e. 11 to 20, 21 to 30 and 31 to 40 registered an increase of 10.75%, 53.50% and 16.04% respectively. At the same time, FSR of 41 to 50, decreased by 42.86%, i.e. from 56 in 2017 to 32 institutions in 2021. Increase in FSR between 11 to 40 reveals that a large number of institutions are trying for a better and acceptable FSR, possibly both for improving their ranking as well as for accreditation and approval (by AICTE). Decreased FSR may have also resulted because of persistent decline in number of students getting enrolled in engineering institutions.

Faculty Student Ratio	2017 (2015-2016)	2018 (2016-2017)	2019 (2017-2018)	2020 (2018-2019)	2021 (2019-2020)	% Increase from 2017 to 2021
1 to 10	3	2	3	1	2	-33.33
11 to 20	335	274	341	346	371	10.75
21 to 30	357	395	419	515	548	53.50
31 to 40	106	102	112	111	123	16.04
41 to 50	56	31	27	34	32	-42.86

**Table 28: Faculty Student Ratio in Eligible Engineering Institutions**

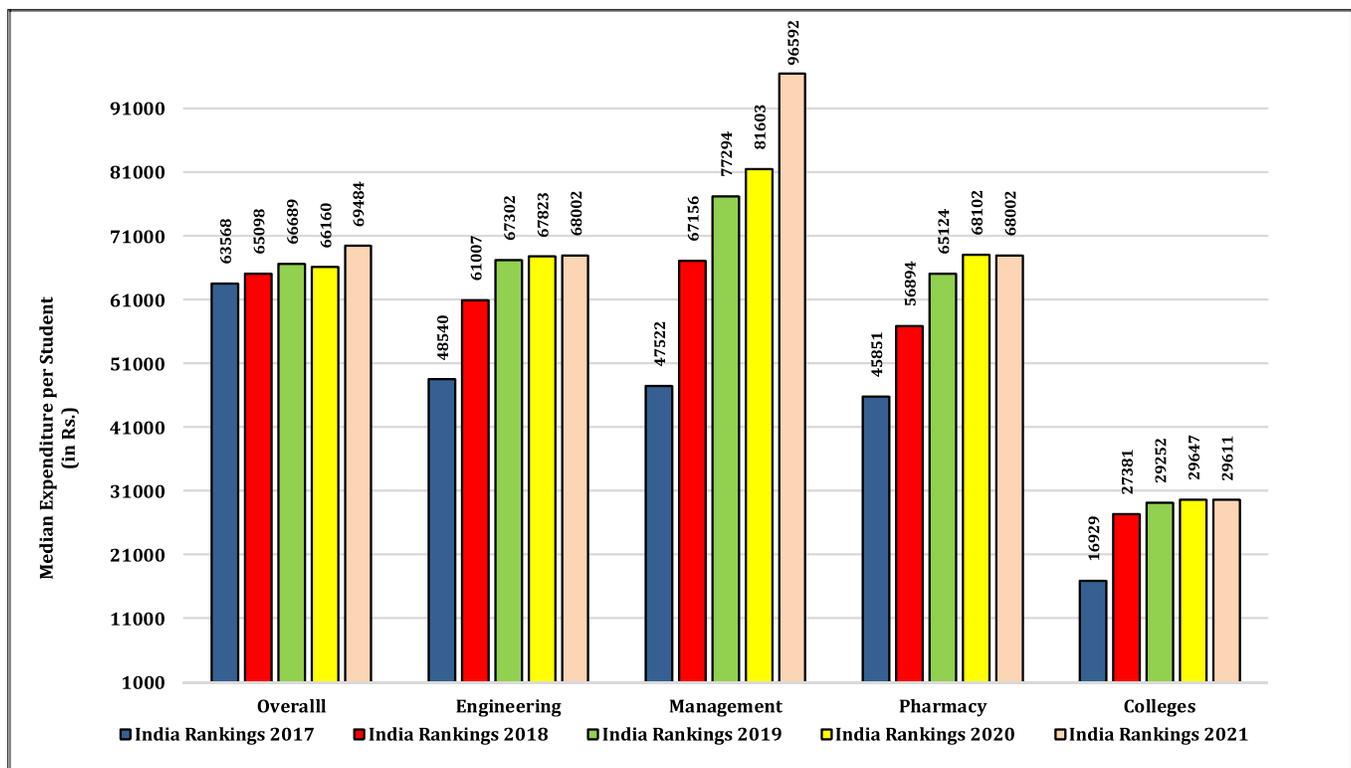

**Fig. 38: Faculty Student Ratio in Eligible Engineering Institutions from 2017 to 2021**

Table 29 and Fig. 39 provide data on median financial resources and their utilization (FRU) including annual capital expenditure and average operational expenditure per student for India Rankings 2017 to India Rankings 2021 in different categories and disciplines. FRU has increased, although marginally, in all categories. The maximum median FRU is Rs. 96,592 in management with 18.37% increase in FRU from 2020 to 2021.

Median FRU	India Rankings					% Increase (2020 to 21)
	2017	2018	2019	2020	2021	
	Amount in Rupees					
Overall	63568	65098	66689	66160	69484	5.02
Engineering	48540	61007	67302	67823	68002	0.26
Management	47522	67156	77294	81603	96592	18.37
Pharmacy	45851	56894	65124	68102	68002	-0.15
Colleges	16929	27381	29252	29647	29611	-0.12

**Table 29: Median FRU for Different Categories and Disciplines from 2017 to 2021**

**Fig. 39: Median FRU for Different Categories and Subject Domains from 2017 to 2021**

### 8.3. Research and Professional Practice

As mentioned earlier, Web of Science and Scopus were used to fetch data on publications, citations and highly cited publications (HCP). For analysis presented here, data from Web of Science is used in the interest of simplicity. Data quoted here refer to three-year period for each ranking exercise. The data considered for publications, citations and other academic activities are for the years as mentioned in Table 30 given below:

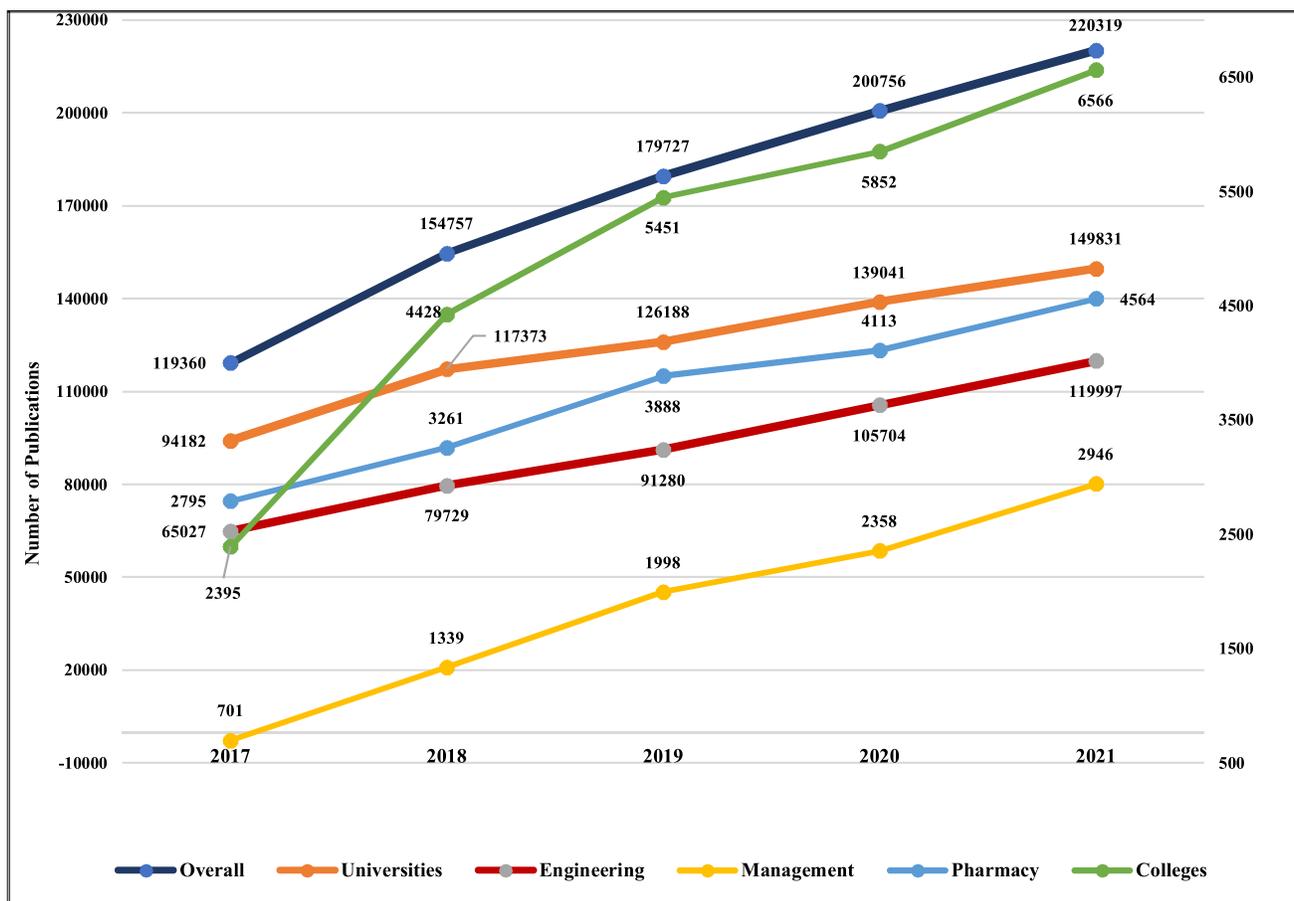

<b>India Rankings Year</b>	<b>Publications / Citations Considered for Calendar Years</b>	<b>Faculty / Student and Faculty-Student Ratio Considered for Academic Years</b>
India Rankings 2016	2012, 2013 and 2014	2011-12, 2012-13, 2013-14
India Rankings 2017	2013, 2014 and 2015	2012-13, 2013-14, 2014-15
India Rankings 2018	2014, 2015 and 2016	2013-14, 2014-15, 2015-16
India Rankings 2019	2015, 2016 and 2017	2014-15, 2015-16; 2016-17
India Rankings 2020	2016, 2017 and 2018	2015-16; 2016-17; 2017-18
India Rankings 2021	2017, 2018 and 2019	2016-17; 2017-18; 2018-19

**Table 30: India Rankings Years: Publications, Citations and Academic Activities Data Considered**

Table 31 and Fig. 40 reveal linear and consistent increase in cumulative number of publications of top 100 ranked institutions across selected categories and subject domains over a period of five years, i.e. from 2017 to 2021. The increase in publications ranges from minimum of 59.09% in case of Universities to the maximum of 320.26% in case of Management, followed by 174.15% in case of Colleges. It may, however, be noted that three years publications are considered for every year's ranking exercise as mentioned in Table 30.

<b>Category / Subject Domains</b>	<b>Number of Publications in Top 100 Ranked Institutions</b>					<b>% Increase 2017 to 2021</b>
	<b>2017</b>	<b>2018</b>	<b>2019</b>	<b>2020</b>	<b>2021</b>	
Overall	119360	154757	179727	200756	220319	84.58
Universities	94182	117373	126188	139041	149831	59.09
Engineering	65027	79729	91280	105704	119997	84.53
Management	701	1339	1998	2358	2946	320.26
Pharmacy	2795	3261	3888	4113	4564	63.29
Colleges	2395	4428	5451	5852	6566	174.15

**Table 31: Increase in Number of Publications of Top 100 Ranked Institutions from India Rankings 2017 to India Rankings 2021 in Various Categories and Subject Domains**

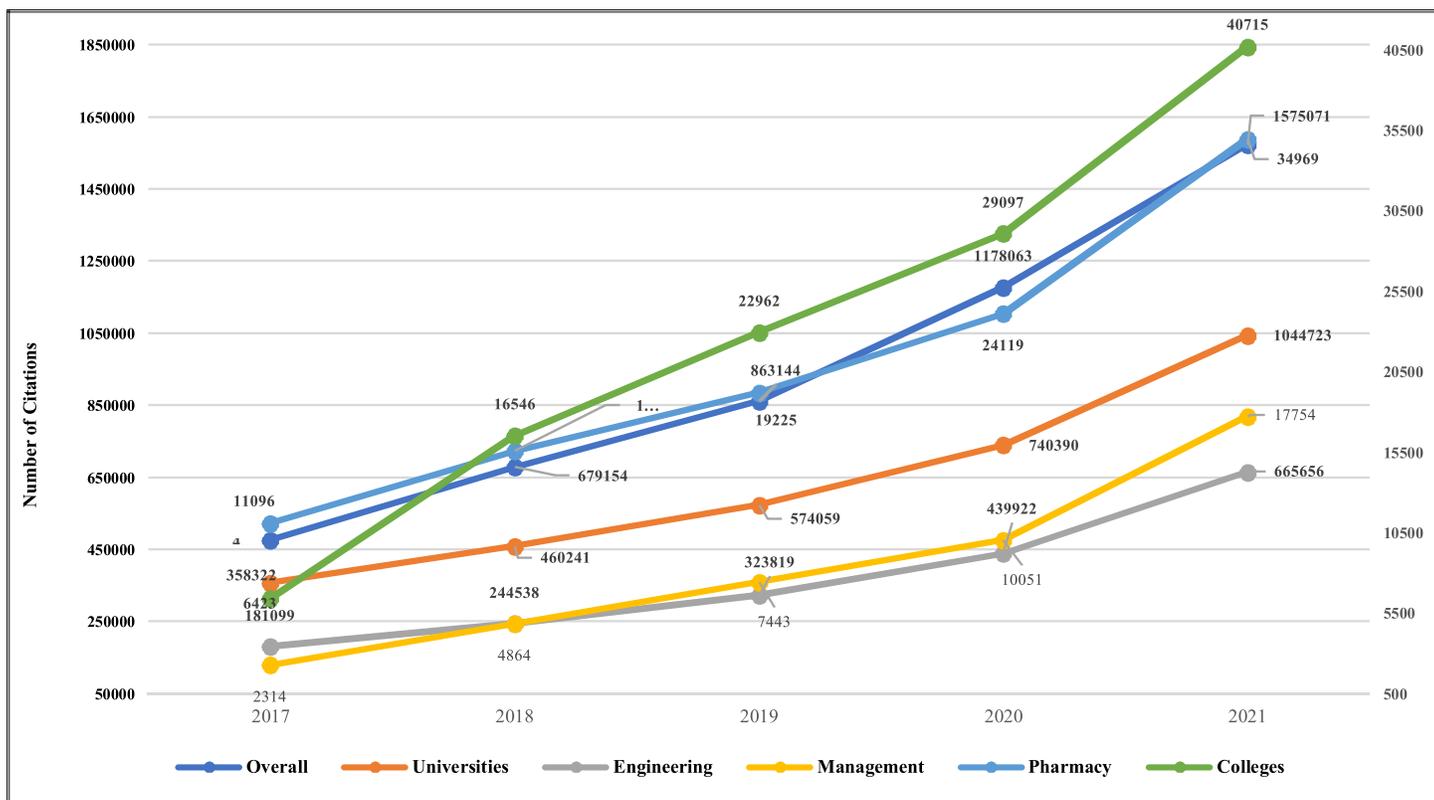

**Fig. 40: Increase in Number of Publications of Top 100 Ranked Institutions from India Rankings 2017 to India Rankings 2021 in Selected Categories and Subject Domains**

Table 32 and Fig. 41 reveal exponential increase in cumulative number of citations of top 100 ranked institutions across selected categories and subject domains over a period of five years, i.e. from 2017 to 2021. The increase in citations ranges from minimum of 191.56% in case of universities to the maximum of 677.24% in case of management.

Category / Subject Domains	Number of Citations in Top 100 Ranked Institutions					% Increase 2017 to 2021
	2017	2018	2019	2020	2021	
Overall	477016	679154	863144	1178063	1575071	230.19
Universities	358322	460241	574059	740390	1044723	191.56
Engineering	181099	244538	323819	439922	665656	267.56
Management	2314	4864	7443	10051	17754	667.24
Pharmacy	11096	15595	19225	24119	34969	215.15
Colleges	6423	16546	22962	29097	40715	533.89

**Table 32: Increase in Number of Citations of Top 100 Ranked Institutions from India Rankings 2017 to India Rankings 2021 in Various Categories and Subject Domains**

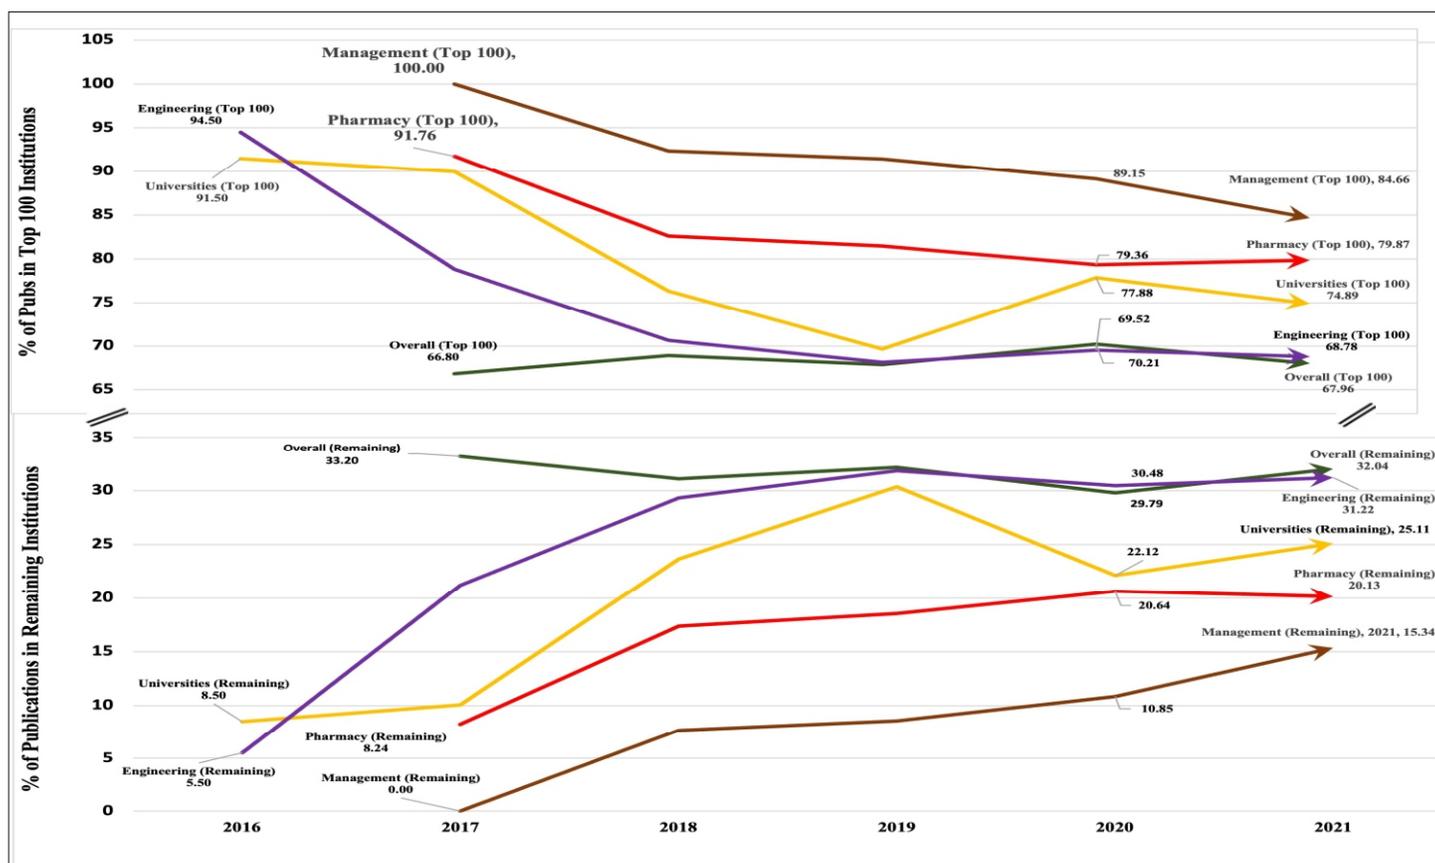

**Fig. 41: Increase in Number of Citations of Top 100 Ranked Institutions from India Rankings 2017 to India Rankings 2021 in Selected Categories and Subject Domains**

Table 33 and Fig. 42 provide ratio of publications of top 100 institutions viz.-a-viz. rest of the eligible institutions in the same domain / category for India Rankings from 2017 to 2021. It is interesting to note that while in 2016 (first year of India Rankings) 91.56% and 94.50% of publications came from first 100 universities and engineering institutions, remaining 8.44% and 5.50% publications came from remaining universities and engineering institutions respectively. However, Pareto’s principle and proportion prescribed by it is not maintained in subsequent years,. However, Pareto’s principle and proportion prescribed by it is not maintained in subsequent years, since publications of first 100 institutions have decreased and remaining institutions have increased in every subsequent year across all categories and subject domains. This trend indicates that a good number of remaining institutions have started publishing more and more research articles to fair better in the subsequent ranking exercise. It may, however, be noted that remaining institutions include all additional institutions that may not have applied for ranking in previous years.

Discipline / Category	2016		2017		2018		2019		2020		2021	
	% of Pubs. in <= 100 Inst.	% of Pubs. in Remaining Inst.	% of Pubs. in <= 100 Inst.	% of Pubs. in Remaining Inst.	% of Pubs. in <= 100 Inst.	% of Pubs. in Remaining Inst.	% of Pubs. in <= 100 Inst.	% of Pubs. in Remaining Inst.	% of Pubs. in <= 100 Inst.	% of Pubs. in Remaining Inst.	% of Pubs. in <= 100 Inst.	% of Pubs. in Remaining Inst.
Overall	-	-	66.80	33.20	68.91	31.09	67.84	32.16	70.21	29.79	67.96	32.04
Universities	91.56	8.44	89.96	10.04	76.36	23.64	69.63	30.37	77.88	22.12	74.89	25.11
Engineering	94.50	5.50	78.81	21.19	70.65	29.35	68.13	31.87	69.52	30.48	68.78	31.22
Management	-	-	100	0	92.34	7.66	91.44	8.56	89.15	10.85	84.66	15.34
Pharmacy	-	-	91.76	8.24	82.62	17.38	81.46	18.54	79.36	20.64	79.87	20.13
Colleges	-	-	92.97	7.03	55.44	44.56	45.56	54.44	43.14	56.86	41.79	58.21

**Table 33: Research Publications of Top 100 Institutions in Comparison to the Rest of the Eligible Institutions in Various Categories and Subject Domains from 2016 - 2021**

**Fig. 42: Research Publications of Top 100 Institutions in Comparison to the Rest of the Eligible Institutions in Various Categories and Subject Domains from 2016 - 2021**

Table 34 provides ratio of highly cited publications of top 100 institutes viz.-a-viz. rest of the eligible institutions in the same category or subject domain for India Rankings from 2017 to 2021. As in case of publications, first 100 universities and engineering institutions account for 93.44% and 85.36% of the HCP and remaining universities and engineering institutions accounts for 6.56% and 14.64% of HCP respectively in India Rankings 2017. In case of Management and Pharmacy, first 100 institutions account for 100% HCP whereas contributions of remaining institutions is “0” in India Rankings 2017. However, as in case of publications, this proportion is not maintained in subsequent years, as HCP of first 100 institutions has decreased whereas remaining institutions have registered increase in HCP in every subsequent year across all categories and subject domains. This trend indicates that a good number of remaining institutions are not only publishing their research works but also attracting their share of citations.

Categories / Domains	India Rankings				
	2017	2018	2019	2020	2021
Overall (Top 100)	73.63	73.27	67.84	76.45	72.82
Overall	26.37	26.73	32.16	23.55	27.18
Universities (<100)	93.44	78.42	70.58	80.00	76.99
Universities	6.56	21.58	29.42	20.00	23.01
Engineering (<100)	85.36	78.03	79.74	78.72	75.54
Engineering	14.64	21.97	20.26	21.28	24.46
Management (<100)	100.00	94.65	94.60	92.64	90.96
Management	0.00	5.35	5.40	7.36	9.04
Pharmacy (<100)	100.00	90.44	90.65	91.75	89.73
Pharmacy	0.00	9.56	9.35	8.25	10.27

**Table 34. Highly-cited Publication of top 100 Institutions in Comparison to the Rest of the Eligible Institutions in various Domains / Categories**

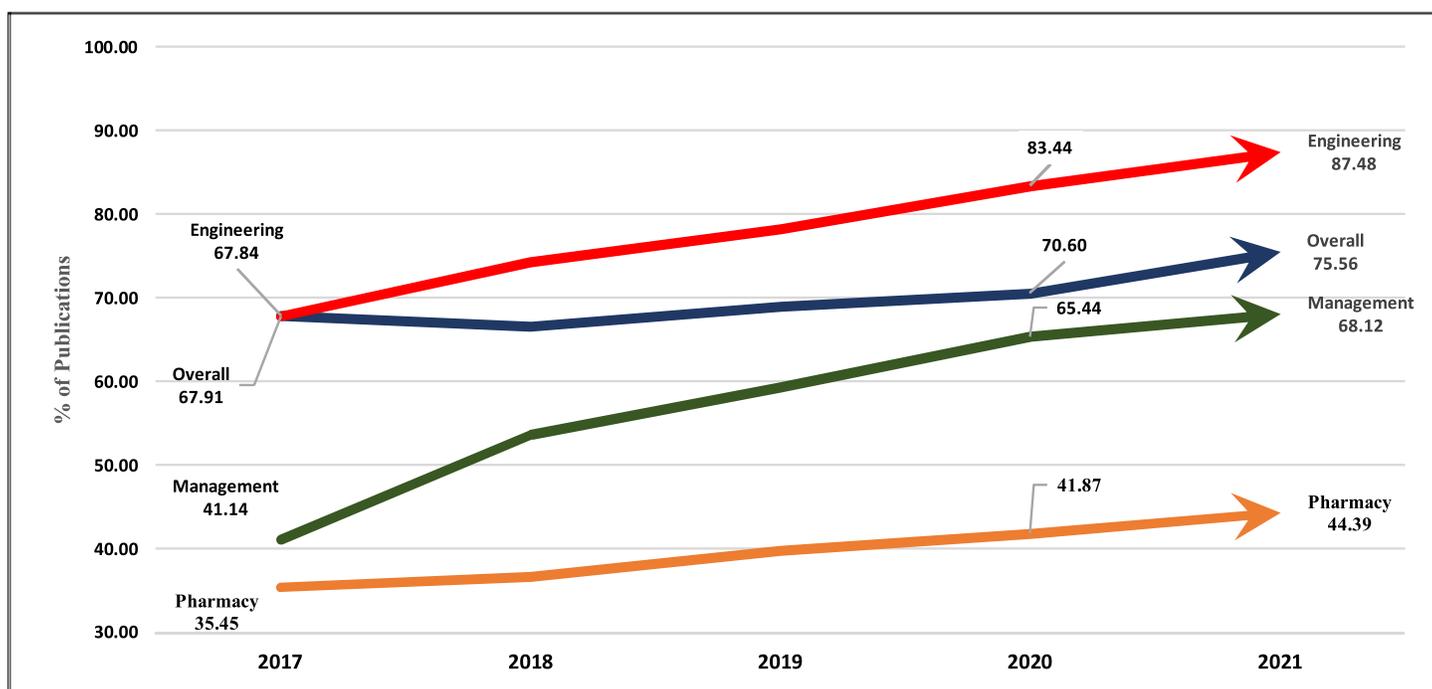

Table 35 and Fig. 43 show numbers of publications from India as compared to that of all eligible institutions in their respective categories / subject domains. It can be seen that % of publications by eligible institutions has increased in linear proportion every year from 2017 to 2021. This essentially indicates the followings:

- i) Eligible institutions have intensified their research publications activity so as to secure better rank in subsequent years;
- ii) Eligible institutions are increasingly publishing in good-quality journals that are indexed in Web of Science or Scopus; and
- iii) More and more institutions are now participating in India Rankings.

Categories / Subject Domains	India Rankings Year									
	2017		2018		2019		2020		2021	
	India	% by NIRF*	India	% by NIRF*	India	% by NIRF*	India	% by NIRF*	India	% by NIRF*
Overall	263125	67.91	336978	66.64	383803	69.03	404953	70.60	429025	75.56
Engineering	121615	67.84	151884	74.30	171074	78.32	182221	83.44	199431	87.48

\*% of Publications by Eligible Institutions

**Table 35: Research Publications of Eligible Institutions in Comparison to Total Research Publications of India**

**Fig. 43: Increase in Research Publications of Eligible Institutions in Comparison to Total Research Publications of India from 2017 to 2021**

It has been reported in the previous editions of India Rankings that a significant number of eligible institutions did not have any publication. Table 36, however, reveals that percentage of institutions having “0” publications are decreasing gradually every year with a few exceptions. It can be observed that a sizable percentage of colleges (last row) do not have any publications which can be linked to their primary role of imparting education at undergraduate level. It is indeed intriguing that a sizable number of management institutions (ranging from 55.01% in 2021 to 84.04% in 2017) have “0” publication possible because their focus is on “case studies” rather than on research publications.

Year	2016	2017	2018	2019	2020	2021
<b>(No. of Inst. in 2021)</b>	<b>% of Institutions having “0” Publications</b>					
Overall (970)		15.23	13.59	7.53	7.54	7.42
Universities (309)	13.08	0.013	2.03	7.64	0.37	0.00
Engineering (1076)	20.00	23.18	9.76	6.31	6.65	5.67
Management (603)	65.33	84.04	69.78	66.27	63.56	55.01
Pharmacy (333)	23.33	34.43	20.73	14.88	15.36	12.91
College (1109)		60.31	39.79	31.47	31.76	32.82

**Table 36: Number and % of Eligible Institutions having “0” Publications Various Categories and Subject Domains**

A closer examination of research publications of the top ranked 100 institutions in Engineering discipline over past five years, i.e. from 2017 to 2021 reveals that IITs have been contributing the most in terms of percentage of publications with their contribution ranging from 35% in 2017 to 35.79% in 2021 followed by deemed-to-be-universities with their contribution ranging from 12% in 2017 to 22.10% in 2021 and NITs with their contribution ranging from 15% in 2017 to 18.82% in 2021 (See Table 37).

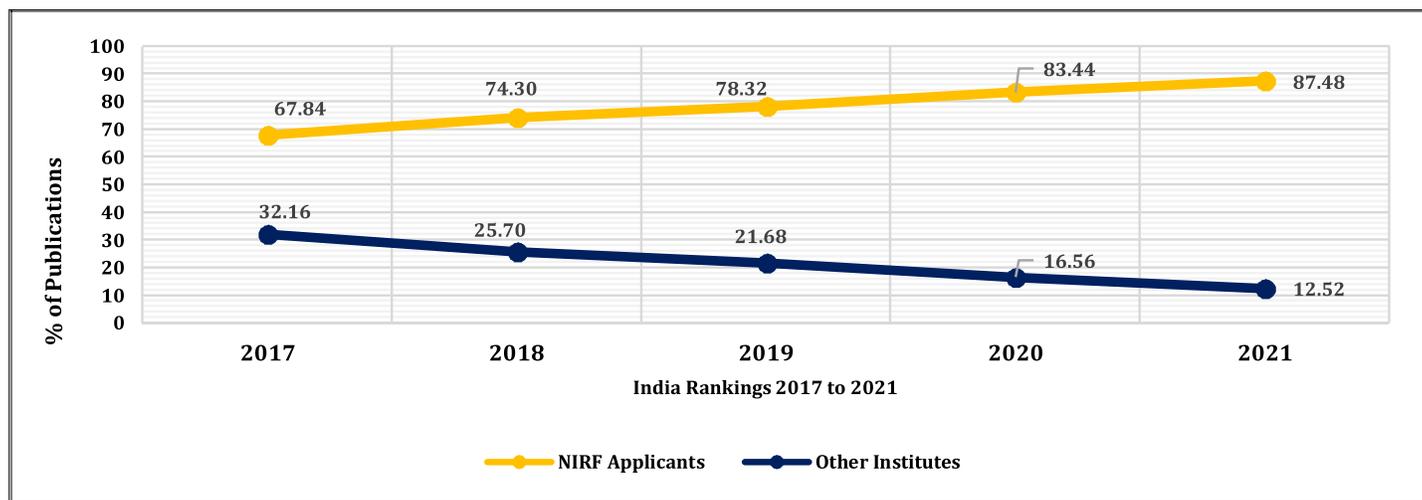

Categories of Institutions	2017	2018	2019	2020	2021
	% of Publications				
IITs	35	38	35	36.59	35.79
State Universities	15	13	12	9.70	8.53
NITs	15	17	17	18.12	18.82
Deemed to be Universities	12	16	20	21.46	22.10
Engineering Colleges	7	7	8	6.83	5.79
Private Universities	3	3	3	3.31	4.86
Other CFTIs	3	2	3	2.17	2.09

**Table 37: Share of Publications from top 100 Engineering Institutions (Ranked by Research Publications) from 2017 to 2021**

Table 38 and Fig. 44 depict increase in research publications of eligible institutions with decrease in publications output of other institutions in engineering over a period of five years, i.e. from 2017 to 2021. It is evident that the no. of research publications of eligible institutions have increased from 67.84% in 2017 to 87.48% in 2021 whereas other institutions have registered decrease in number of publications from 32.16% in 2017 to 12.52% in 2021.

Years / Institutions	2017	2018	2019	2020	2021
Eligible Institutions (India Rankings)	67.84	74.30	78.32	83.44	87.48
Other Institutions	32.16	25.70	21.68	16.56	12.52

**Table 38: Share of Publications of Eligible Institutions vs Other Institutions in India in Engineering from 2017 to 2021**

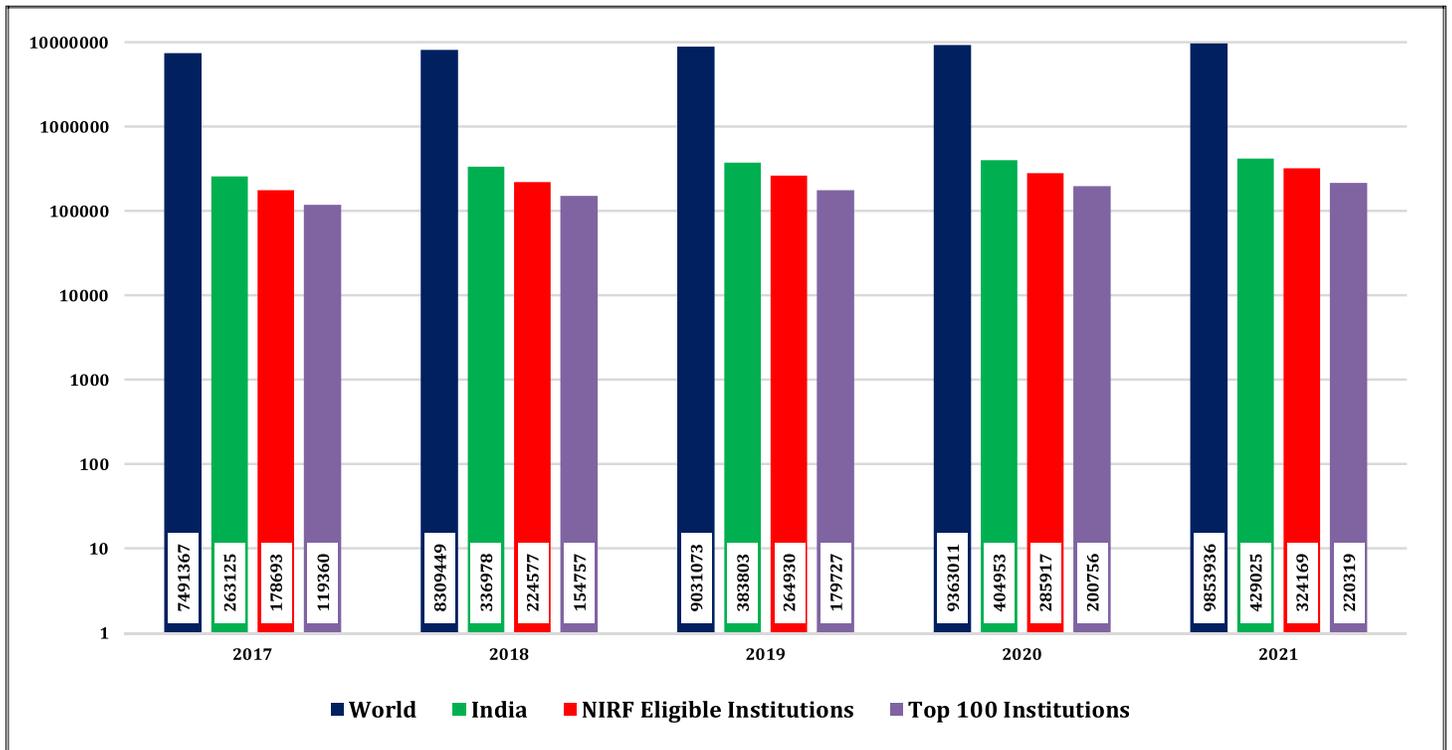

**Fig. 44: Share of Publications of Eligible Institutions vs Other Institutions in Engineering from 2017 to 2021**

Table 39 and Fig. 45 depict consistent increase in research publications of the World as compared to India, Eligible institutions and Top 100 institutions from 2017 to 2021 in Overall category. The increase is to the tune of 31.54, 63.05, 81.41 and 84.58 for the World, India, Eligible Institutions and Top 100 institutions respectively.

Year / Entity	2017	2018	2019	2020	2021	% Increase from 2017 to 2021
World	74,91,367	83,09,449	90,31,073	93,63,011	9,85,3936	31.54
India	2,63,125	3,36,978	3,83,803	4,04,953	4,29,025	63.05
Eligible Institutions	1,78,693	2,24,577	2,64,930	2,85,917	3,24,169	81.41
Top 100 Institutions	119360	1,54,757	1,79,727	2,00,756	2,20,319	84.58

**Table 39: Comparative Research Publications of World, India and Eligible Institutions in Overall Category for the Years 2017 - 2021**

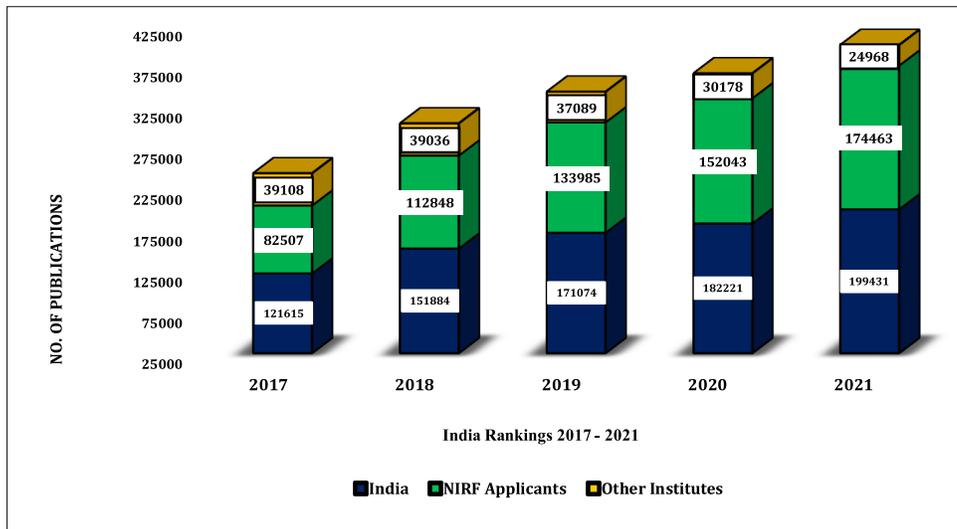

**Fig. 45: Comparative Research Publications of World, India, Eligible Institutions and Top 100 Institutions in Overall Category for the Years 2017 - 2021**

Table 40 and Fig. 46 provide research publications of India, Eligible institutions and other institutions in Engineering. The Figure depicts linear and gradual increased in publication of India as well as that of eligible institutions in Engineering category over a period of five years, i.e. from 2017 to 2021. Persistent and linear decrease in number of publications in case of other institutions is also evident from Fig. 46.

Year / Entity	2017	2018	2019	2020	2021	% Increase from 2017 to 2021
India	1,21,615	1,51,884	1,71,074	1,82,221	1,99,431	63.99
Eligible Institutions	82,507	1,12,848	1,33,985	1,52,043	1,74,463	111.45
Other Institutions	39,108	39,036	37,089	30,178	24,968	-36.16

**Table 40: Comparative Research Publications of India, Eligible Institutions and Other Institutions in Engineering from 2017 to 2021**

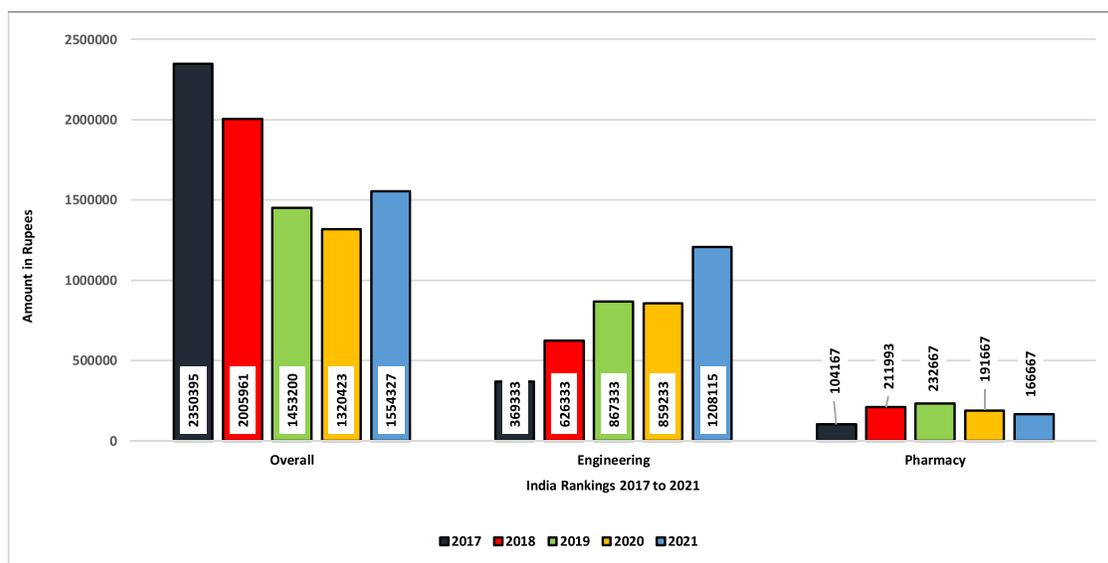

**Fig. 46: Comparative Research Publications of India, Eligible Institutions and Other Institutions in Engineering from 2017 to 2021**

Table 41 and Fig. 47 provide median amount of sponsored research funding in Overall, Engineering and Pharmacy. In general, decrease in amount of sponsored research funding is evident in all categories over a period of 5 years, i.e. from 2017 to 2021. However, amount of sponsored research in case of Overall category and Engineering has increased by 17.71% and 40.60% from 2020 to 2021.

Median SP	India Rankings 2017	India Rankings 2018	India Rankings 2019	India Rankings 2020	India Rankings 2021
Overall	2350395	2005961	1453200	1320423	1554327
Engineering	369333	626333	867333	859233	1208115
Pharmacy	104167	211993	232667	191667	166667

**Table 41: Comparison of Sponsored Research Funding in Overall, Engineering and Pharmacy: India Rankings in Past Five Years (2017 - 2021)**

**Fig. 47. Comparison of Sponsored Research Funding in Overall, Engineering and Pharmacy: India Rankings in Past Five Years (2017 - 2021)**

## 9. Computation of Scores and Rankings

Rankings are based on the information and data provided by the institutions. Data on publications and citations have been taken from standard indexing and citation sources, viz., Scopus (Elsevier Science) and Web of Science (Clarivate Analytics). Perception data has been compiled from inputs from employers and peers. NIRF Team has done limited validation of data. NIRF also provided an opportunity to the general public through press advertisement and through web-portal, to give feedback on the quality and accuracy of data submitted by different institutions. Queries and comments received from the public were passed on to the concerned institutions for suitable action. However, responsibility for the accuracy and authenticity of the data lies with the institutions supplying it. Final data are available on the NIRF portal.

Overall weighted scores and ranks of institutions in different subjects / categories as well as their weighted scores on five broad generic parameters are given at 9.1 to 9.11.

**Top Ranked Institutions  
in  
Various Categories**

## 9.1 India Rankings 2021: Top 100 in Overall

Name	City	State	Rank
Indian Institute of Technology Madras	Chennai	Tamil Nadu	1
Indian Institute of Science	Bengaluru	Karnataka	2
Indian Institute of Technology Bombay	Mumbai	Maharashtra	3
Indian Institute of Technology Delhi	New Delhi	Delhi	4

The Indian Institute of Technology Delhi (IIT Delhi) is a public engineering and research institute situated in Hauz Khas, Delhi. The Institute was established in 1961 as the College of Engineering & Technology affiliated to University of Delhi and was renamed later as "Indian Institute of Technology Delhi". IIT Delhi is an Institute of National Importance declared by the Government of India. The Indian Institute of Technology Delhi stands at the 4<sup>th</sup> position in Research Category of India Rankings 2021.

## Indian Institute of Technology Kharagpur

Rank - 5

The Indian Institute of Technology Kharagpur (IIT Kharagpur) is a public engineering institute and Institute of National Importance established by the Government of India in 1951. The Institute was established and started its journey in the old Hijli Detention Camp, Hijli, Kharagpur, West Bengal. The Indian Institute of Technology Kharagpur stands at the 5<sup>th</sup> position in Research Category of India Rankings 2021.

## **11. Execution**

### **11.1 National Board of Accreditation (NBA)**

The National Board of Accreditation (NBA) was the primary agency that was given the overall responsibility of co-ordinating and executing the Ranking work in consultation with the Implementation Core-Committee, constituted by the Ministry of Education. NBA invited applications for registration of institutions for ranking in various disciplines and the overall ranking. It coordinated with its collaborators to execute all aspects of the ranking work.

### **11.2. INFLIBNET Centre**

The Information and Library Network (INFLIBNET) Centre was responsible for the development of NIRF Web Portal including data capturing system, perception capturing system, the feedback mechanism and the ranking platform. The Centre also provided and verified data on publications, citations, patents, top 25% highly cited papers, H-Index and JCR-IQ. The Centre also deployed technical help desk at its premises.

### **11.3 Other Acknowledgements**

We acknowledge with gratitude the help and advice from UGC and AICTE from time to time. We especially acknowledge the help and advice from our industrial partners, Elsevier and Clarivate Analytics.
